Artificial Intelligence for Customer Relationship Management-Boris Galitsky 2021-01-24 The second volume of this research monograph describes a number of applications of Artificial Intelligence in the field of Customer Relationship Management with the focus of solving customer problems. We design a system that tries to understand the customer complaint, his mood, and what can be done to resolve an issue with the product or service. To solve a customer problem efficiently, we maintain a dialogue with the customer so that the problem can be clarified and multiple ways to fix it can be sought. We introduce dialogue management based on discourse analysis: a systematic linguistic way to handle the thought process of the author of the content to be delivered. We analyze user sentiments and personal traits to tailor dialogue management to individual customers. We also design a number of dialogue scenarios for CRM with replies following certain patterns and propose virtual and social dialogues for various modalities of communication with a customer. After we learn to detect fake content, deception and hypocrisy, we examine the domain of customer complaints. We simulate mental states, attitudes and emotions of a complainant and try to predict his behavior. Having suggested graph-based formal representations of complaint scenarios, we machine-learn them to identify the best action the customer support organization can chose to retain the complainant as a customer.

Developing Enterprise Chatbots-Boris Galitsky 2019-04-04 A chatbot is expected to be capable of supporting a cohesive and coherent conversation and be knowledgeable, which makes it one of the most complex intelligent systems being designed nowadays. Designers have to learn to combine intuitive, explainable language understanding and reasoning approaches with high-performance statistical and deep learning technologies. Today, there are two popular paradigms for chatbot construction: 1. Build a bot platform with universal NLP and ML capabilities so that a bot developer for a particular enterprise, not being an expert, can populate it with training data; 2. Accumulate a huge set of training dialogue data, feed it to a deep learning network and expect the trained chatbot to automatically learn "how to chat". Although these two approaches are reported to imitate some intelligent dialogues, both of them are unsuitable for enterprise chatbots, being unreliable and too brittle. The latter approach is based on a belief that some learning miracle will happen and a chatbot will start functioning without a thorough feature and domain engineering by an expert and interpretable dialogue management algorithms. Enterprise high-performance chatbots with extensive domain knowledge require a mix of statistical, inductive, deep machine learning and learning from the web, syntactic, semantic and discourse NLP, ontology-based reasoning and a state machine to control a dialogue. This book will provide a comprehensive source of algorithms and architectures for building chatbots for various domains based on the recent trends in computational linguistics and machine learning. The foci of this book are applications of discourse analysis in text relevant assessment, dialogue management and content generation, which help to overcome the limitations of platform-based and data driven-based approaches. Not a Fan Student Edition-Kyle Idleman 2013-07-09 If someone asked, "Are you a fan of Jesus?", how would you answer? You attend every movie featuring a certain actor, you know the stats of your sports hero, and can recite each lyric from your favorite band. In short, you're a huge fan. But are you treating Jesus the same as the other people you admire? The truth is, Jesus wants more than the church attendance, occasional prayer, and the ability to recite Scripture—the fan response. He's looking for people who are actually willing to sacrifice in order to follow him. In this student edition of Not a Fan, Kyle Idleman uses humor, personal stories, and biblical truth as he challenges you to look at what it means to call yourself a Christian, and what it means to follow the radical call Jesus presents. So will you be a fan, or a follower?

When Antibiotics Fail-Bryan Rosner 2005 WHY RIFE MACHINES? Lyme Disease is caused by Borrelia Burgdorferi, a spirochete bacteria similar to the bacteria that causes Syphilis . Lyme Disease is known as the "Great Imitator" - It can masquerade as Attention Deficit Disorder , Chronic Fatigue Syndrome , Fibromyalgia, Obsessive Compulsive Disorder , Alzheimer's Disease , Schizophrenia , Depression , Multiple Sclerosis , arthritis , heart conditions, and more. The July, 2004 issue of Townsend Letter for Doctors and Patients indicates that Lyme Disease is thought to be the fastest spreading infectious disease in the world, with more than 200,000 new cases per year in the United States alone. Lyme Disease tests are notoriously inaccurate, leading to rampant under-diagnosis of the disease (See Appendix A). But even the people who are lucky enough to receive an accurate diagnosis do not always respond to antibiotic therapy. Aggressive antibiotic therapy, applied by a Lyme Literate Medical Doctor (LLMD), sometimes fails to provide a cure. Many patients take antibiotics for years, often in combinations of two or three drugs simultaneously - yet in some cases the infection becomes chronic anyway, and numerous Lyme Disease sufferers end up staying sick, losing their jobs, getting dropped by insurance companies, going broke, and losing hope. These monumentally discouraging obstacles facing Lyme Disease sufferers have led many of them to explore the rife machine treatment option, a promising electromagnetic therapy which often works after antibiotics fail.

Not a Fan-Kyle Idleman 2011-06-07 Pastor Kyle Idleman doesn't just want to be a fan of Jesus, he wants to full heartedly commit to him and be a follower of Jesus. But how can you make the leap from fan to follower? In Not a Fan Idleman uses biblical examples to show how the people who met Jesus also had to decide if they were fans or followers, and what it meant for them to then become

followers. Being a follower doesn't mean that you go to church every week, that you slap a Jesus fish on the back of your car, and that you give to charity. That's what a fan does. What a follower of Jesus does, Idleman observes, is die to themselves each and every moment of the day because "you can't say yes to following Jesus unless you say no to living for yourself." In this three part book Idleman helps you to discover whether you are a fan or a follower, how to recognize the invitation Jesus has given, and what following Jesus looks like in your daily life. With humor and real life examples to draw you closer to Jesus, Kyle Idleman compels each and every one of us to Not Be A Fan

Dream with Your Eyes Open-S.G. Cao 2019-02-19 In most cases, the higher something costs, the more value and importance people put on an item—like a house, a car, a computer, a cell phone, or in this case, a book. If I were the one to determine the sales price of my book, I would sell it for at least \$85 to \$110 to limit the number of people from reading my book. The reason is that people mostly likely will value an expensive book more than a book that is less than \$25. Unfortunately, I am not in the position to decide the selling price of my book. To be honest, I actually don't need too many people to read my book so that it is not saturated and people who read my book will appreciate the knowledge that they receive from my book. Regardless whether people value the importance of my book or not, as far as I am concerned, the knowledge that I have written down is the backbone and the essence of my well-being today. I would not have the strength or stamina to write this book without the knowledge that I have. It enables me to go on with my life. I am more energetic and more productive now than I was before. I want to see people live a life full of vitality and energy. Did you ever find yourself lacking the drive, strength, and stamina to continue your day in the past? Do you want to get the fire, energy, power, and enjoyment back in your life? If you do, you have come to the right place. You have the energy and the potential in you. You just don't know it yet. Once you receive the knowledge, you will know it for the rest of your life.
