Mindset Mathematics-Jo Boaler 2017-08-28 Engage students in mathematics using growth mindset techniques The most challenging parts of teaching mathematics are engaging students and helping them understand the connections between mathematics concepts. In this volume, you'll find a collection of low floor, high ceiling tasks that will help you do just

that, by looking at the big ideas at the first-grade level through visualization, play, and investigation. During their work with tens of thousands of teachers, authors Jo Boaler, Jen Munson, and Cathy Williams heard the same message—that they want to incorporate more brain science into their math instruction, but they need guidance in the techniques that work best to get across the concepts they needed to teach. So the authors designed Mindset Mathematics around the principle of active student engagement, with tasks that reflect the latest brain science on learning. Open, creative, and visual math tasks have been shown to improve student test scores, and more importantly change their relationship with mathematics and start believing in their own potential. The tasks in Mindset Mathematics reflect the lessons from brain science that: There is no such thing as a math person - anyone can learn mathematics to high levels. Mistakes, struggle and challenge are the most important times for brain growth. Speed is unimportant in mathematics. Mathematics is a visual and beautiful subject, and our brains want to think visually about mathematics. With engaging questions, open-ended tasks, and four-color visuals that will help kids get excited about mathematics, Mindset Mathematics is organized around nine big ideas which emphasize the connections within the Common Core State Standards (CCSS) and can be used with any current curriculum.

Knitters Graph Blank Paper-Kingkp Publishing 2019-10-17 Knitting Graph Paper 4:5 Ratio 100 pages This Knitting Graph Notebook is ideal to designed and formatted knitters. Knitting paper is used to design knitting charts for new patterns. Have you ever tried to design a knitting chart using commercially available graph paper, only to knit it up and find the proportions are all wrong? This is because knitting stitches are not square but commercially available graph paper is! The answer is my special charting paper. The ◆squares◆ are rectangular just like knitting stitches. In addition, every 5 stitches are marked off with a heavier line so it ◆s very easy to count where you are when following a pattern. A ratio of 4:5 is where 4 stitches are the same length as 5 rows (or 40 stitches = 50 rows). Perfectly sized at 8.5"x11" 100 Pages Not perforated Softcover bookbinding Flexible Paperback
