**Parenting Matters**-National Academies of Sciences, Engineering, and Medicine 2016-11-21 Decades of research have demonstrated that the parent-child dyad and the environment of the familyâ€"which includes all primary caregiversâ€"are at the foundation of children's well- being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

**Key Topics in Public Health E-Book**-Linda Ewles 2005-05-24 Key Topics is a short, easy-to-read text that provides basic information about twelve key topics in public health, such as diabetes, cancer, smoking and teenage pregnancy, and how prevention and health promotion should be tackled at community and one-to-one levels. The twelve topics are the 'must-dos' of public health action. They have been selected because they are those addressed in current national public health strategies such as Saving Lives: our healthier nation , and comparable strategies in Scotland, Wales and Northern Ireland. Many are the subject of National Service Frameworks and other national policies and plans; they are often accompanied by targets which health workers are expected to meet. Accessible and useful, in clear plain English. Provides a foundation for further study, planning a work programme, or planning a strategy to meet targets. Practical focus: on health inequalities and how to tackle them, and on help for practitioners who work at a community and one-to-one level. Explicit links to national current public health policy and targets. Reflects recommendations based on best practice and evidence of effectiveness. Focuses on a topic framework (except for the last two chapters) in contrast to other frameworks for health promotion and public health. Attractive layout making full use of bullet points and boxes. Simple line diagrams or tables to illustrate each chapter.

**Multi Asset Class Investment Strategy**-Guy Fraser-Sampson 2006-07-11 The book explains that instead of asset allocation being set in an isolated and arbitrary fashion, it is in fact the way in which specific hurdle investment returns can be targeted, and that this approach is already in use in the US (and has been for many years). It involves extended and detailed financial analysis of various asset class returns and proposes a five-asset class approach for future use. Opening with a study of the historic asset allocation practice of UK pension funds, the book shows how the current approach has led to the present funding crisis. It goes on to compare and contrast the UK approach with that of the US and to propose a new approach to UK asset allocation: the five asset class approach ("MAC Investing"). The book reviews and analyses different asset classes based on historic returns, examines risk, and concludes with a suggestion of the five asset classes to use; Quoted equities (both Domestic and foreign), hedge funds, private equity and property. This book also includes benchmark performance figures never previously published.

**Gifted and Talented in the Early Years**-Margaret B. Sutherland 2005 'Clear, concise and user-friendly best describe this practical hands-on book...Sutherland's text provides myriad practical observation ideas, identification, learning activities and resources to challenge young learners.' Susen Smith, former primary school teacher 'When I flipped this book open for the first time I just expected to get some useful tips about challenging activities for gifted pre-school children. But what Margaret Sutherland gives us in this book goes far beyond that...This book is a valuable tool for the work with gifted pre-school children and should be available in every pre-school institution.' - Gifted and Talented International Journal `I felt reassured by the way practitioners are encouraged to consider children's development holistically. The activities given to challenge children identified as talented or gifted are practical and easily implemented' - Nursery World 'In 100 clear and concise pages, Margaret Sutherland offers eminently practical hints and suggestions covering observation and identification and the sort of activities and resources that build confidence and skill in the very youngest learners' - Michael Duffy, The Times Educational Supplement `This book would be a useful addition to any early years bookshelf or staff room to assist with the planning an inspirational learning journey' - National Association of Gifted Children Newsletter 'This book is very readable, full of practical advice, and a must for all those involved in Early Years, including parents' - Johanna M Raffan, Director of NACE, National Associaton for Able Children How can we identify gifted and talented young children in pre-school settings and how can existing resources be used to challenge and stimulate them? In this book you will find: - practical and easily implemented lesson ideas for physical movement, maths, language and music; - guidance on how to make sure all children are given the opportunity to achieve; - practical ideas for the identification of able young children; - summaries of key ideas at the end of each chapter; - a glossary of terms. The ideas and activities have all been tried and tested by practitioners and show how to help gifted children to flourish and all children to benefit from imaginative approaches to learning. Most importantly, they are based on using resources already in common use in most early years settings which can be easily adapted. Teachers, nursery nurses, teaching assistants and advisers will find this book a down-to-earth guide to helping able young children and all young children make the most of educational opportunities.

**The Book of the Animals - Episode 6 (Bilingual English-Spanish)**-J.N. PAQUET 2013-11-11 NEW EDITION!!Well... it seems that these animals don't want to take their medicine! But step by step, each one discovers that taking medicine is very important for the animals, as well as for the children!A funny way to learn and a funny way to teach. As everyone knows how difficult it can be to explain to young children how important it is to take medicine....--THE BOOK OF THE ANIMALS:FUN LEARNING FOR CHILDREN AND PARENTSWhat are certainly the most occurring moments in a parent's life? When their child doesn't want to wash, eat, sleep, go to school, share, take medicine, get vaccinated... And what can a parent answer to these refusals?The successful "Book of The Animals" bilingual children's books series was created with the aim to help both parents and children to discover the benefits of washing, eating, sleeping, going to school, sharing, taking medicine, getting vaccinated... in a fun as well as educational manner. Since the books are also bilingual, parents will enjoy the teaching and the interactivity they can gain from reading them with their children.THE AUDIENCEThe books are geared towards children aged 2-5, before elementary/primary school.They will likely be bilingual children whose parents want to encourage the learning of their two current languages.They will also be children whose parents want to teach a language at a young age.Some teachers have also been using the books of the series as a way to teach a second language to children, with themes easy for them to both understand and memorise.THE CURRENT BOOKSThere are currently seven books in the series.Each episode brings on new animals, new words, new situations and new stories.- Ep.1. "These Animals... Don't Want to Wash!" (2008)- Ep.2. "These Animals... Don't Want to Eat!" (2009)- Ep.3. "These Animals... Don't Want to Sleep!" (2010)- Ep.4. "These Animals... Don't Want to Go to School!" (2011)- Ep.5. "These Animals... Don't Want to Share!" (2011)- Ep.6. "These Animals... Don't Want to Take their Medicine!" (2012)- Ep.7. "These Animals... Don't Want to Get Vaccinated!" (2012)The books are all available in either bilingual or monolingual versions- Bilingual versions: English-French, English-Portuguese, English-Italian, English-Spanish, English-Swedish, English-Creole, English-Japanese...More versions still to come!Check out the official website: www.TheBookOfTheAnimals.comREVIEW"The Book of the Animals is a planned series of illustrated books for young children. [...] These delightful books tell the story of what happens when the animals in the stories, like many young children, don't want to eat and don't want to wash...The books are very suitable both for reading to young children and for older children to use to learn to read in both languages. They might even persuade them to wash and eat their dinner!The repetitive structure is supportive of children learning new words and the illustrations work well alongside the text to help understanding of unfamiliar words.I can easily imagine young children demanding repeat readings and enjoying learning the text by heart as many children do with favourite stories. Children learning to make up and write their own stories might well want to write a personalised version, using the structure as a prop.I think the stories would work well both in the home and in the classroom."(Review published in The Cass School of Education, by Dr Raymonde Sneddon, Research Fellow for "The Cass School of Education" at the University of East London, and Honorary Research Fellow of Birkbeck College, in the Department of Applied Linguistics)SUPPORT"The Book of The Animals' series is supported & recommended by ABRIR UK, a Brazilian Association for Educational Projects in the United Kingdom. www.Abrir.org.ukOfficial website: TheBookOfTheAnimals.com

**Nonsuicidal Self-Injury**-E. David Klonsky 2011 Nonsuicidal self-injury (NSSI) is a baffling, troubling, and hard to treat phenomenon that has increased markedly in recent years. Key issues in diagnosing and treating NSSI adequately include differentiating it from attempted suicide and other mental disorders, as well as understanding the motivations for self-injury and the context in which it occurs. This accessible and practical book provides therapists and students with a clear understanding of these key issues, as well as of suitable assessment techniques. It then goes on to delineate research-informed treatment approaches for NSSI, with an emphasis on functional assessment, emotion regulation, and problem solving, including motivational interviewing, interpersonal skills, CBT, DBT, behavioral management strategies, delay behaviors, exercise, family therapy, risk management, and medication, as well as how to successfully combine methods.

**From Birth to Five Years: Practical Developmental Examination**-Ajay Sharma 2014-02-03 From Birth to Five Years: Practical Developmental Examination is a step-by-step ‘how to’ guide to the developmental examination of pre-school children. This book has been developed alongside the original From Birth to Five Years as a companion volume that expands on the normative developmental stages outlined in Mary Sheridan’s pioneering work in the field, by offering practical guidance for health, education and social care professionals, or anyone concerned with putting the theory behind children’s developmental progress into practice in a real-life setting. This book is based on up-to-date research into current child development philosophies and practices, and aims to support the wider group of professionals that are required to assess children’s developmental progress as part of their day-to-day working practices. The book begins with a practical framework for developmental examination, then progresses through each of the key physical, cognitive and social developmental assessment areas, offering guidance on enquiry and observation, and how to chart typical and atypical patterns, with ‘red flags’ for recognising significant delay or abnormality. Advice is also given on how to make sense of the findings and how best to communicate this information to parents. To consolidate and expand on the practical and theoretical information across this book and the original From Birth to Five Years, a new companion website is available at www.routledge.com/cw/sharma, which includes the following additional learning material: An interactive timeline of the key developmental domains Introductions to theory with links to further reading Research summaries Video clips demonstrating practical assessment skills

**Learn Sociology**-Edward Brent 2013-03-15 Learn Sociology creates a new paradigm for student-centered learning in introductory sociology courses. Written with 21st century students in mind, this text presents introductory sociology content in a highly interactive format that is both easy to use and highly compatible with digital applications. Drawing on best practices in educational pedagogy, Learn Sociology emphasizes “immersive learning,” an approach that pairs critical analysis of sociological concepts with examples from everyday life to engage students actively with the material. Weaved through the text are recurring themes that put sociology into context, such as social structure, social control, social inequality, the social construction of reality, scientific knowledge, and social change. Learn Sociology optimizes learning through enhanced coverage, study, testing, and review while emphasizing the “applying” that reinforces comprehension. Based on a modular concept format, each chapter in Learn Sociology addresses a major concept in the introductory sociology curriculum. Associated with each module are key learning objectives, preview statements, illustrations, and a concept learning check assessment. With Learn Sociology, students have access to immediate computer-based feedback on essay questions that helps them practice writing and revising, reason critically, and grapple with real-world issues. All content in Learn Sociology is highly visual, current, and easy to understand while avoiding distracting and off-topic material. Visual overviews play to dynamic learning and underscore important points. The result is an introductory sociology curriculum that is engaging, consistent, and complete while providing students with a roadmap for learning, reviewing and self-assessment.
