USB Embedded Hosts-Jan Axelson 2011-11-01 Developers who want to access USB devices from their embedded systems will find a helpful resource in USB Embedded Hosts: The Developer's Guide. This new book from the author of USB Complete shows how small systems can take advantage of the same wealth of USB devices available to conventional PCs. The book begins with a review of USB host communication protocols. Readers then learn which USB host requirements are relaxed for embedded systems and what new requirements some embedded systems must meet. To help in selecting a development platform, the book explores available hardware and software for USB host communications in small systems. The heart of the book focuses on communicating with USB devices. The topics (with example code) include USB drives, keyboards, virtual serial ports, network bridges, mics, speakers, video cameras, and printers, plus devices that don't fit defined USB classes. Also discussed are systems that support both USB host and device functions. The example code is written for the BeagleBoard-xM open development board using a distribution of Linux targeted to small systems. Also covered is how to use Linux commands and utilities to learn about, monitor, and debug communications with USB devices.

Dead Wrong-Richard Belzer 2012-08-01 For years, the government has put out hits on people that they found “expendable,” or who they felt were “talking too much,” covering up their assassinations with drug overdoses and mysterious suicides. In *Dead Wrong*, a study of the scientific and forensic facts of various Government cover-ups, Richard Belzer and David Wayne argue that Marilyn Monroe was murdered, that the person who shot Martin Luther King Jr. was ordered to do so by the government, and examines many other terrifying lies we've been told throughout our country's history. The extensive research shows how our government has taken matters into its own hands, plotting murder whenever it saw fit. Belzer and Wayne also examine the deaths of White House Counsel Vincent Foster, U.N. Weapons Inspector Dr. David C. Kelly, and bio-weapons expert Dr. Frank Olson, as well as the cases of two murders directly linked Lyndon B. Johnson, the 36th President of the United States. “Big Brother” is watching you—through the scope of a sniper rifle. *Dead Wrong* will give you the straight facts on some of the most controversial and famous deaths this country has ever seen. The harsh reality is that our government only tells us what we want to hear, as they look out for their own best interests and eliminate anyone who gets in their way. I Kiss Your Hands Many Times-Marianne Szegedy-Maszak 2013-08-27 A magnificent wartime love story about the forces that brought the author's parents together and those that nearly drove them apart Marianne Szegedy-Maszak's parents, Hanna and Aladár, met and fell in love in Budapest in 1940. He was a rising star in the foreign ministry—a vocal anti-Fascist who was in talks with the Allies when he was arrested and sent to Dachau. She was the granddaughter of Manfred Weiss, the industrialist patriarch of an aristocratic Jewish family that owned factories, were patrons of intellectuals and artists, and entertained dignitaries at their baronial estates. Though many in the family had converted to Catholicism decades earlier, when the Germans invaded Hungary in March 1944, they were forced into hiding. In a secret and controversial deal brokered with Heinrich Himmler, the family turned over their vast holdings in exchange for their safe passage to Portugal. Aladár survived Dachau, a fragile and anxious version of himself. After nearly two years without contact, he located Hanna and wrote her a letter that warned that he was not the man she'd last seen, but he was still in love with her. After months of waiting for visas and transit, she finally arrived in a devastated Budapest in December 1945, where at last they were wed. Framed by a cache of letters written between 1940 and 1947, Szegedy-Maszak's family memoir tells the story, at once intimate and epic, of the complicated relationship Hungary had with its Jewish population—the moments of glorious humanism that stood apart from its history of anti-Semitism—and with the rest of the world. She resurrects in riveting detail a lost world of splendor and carefully limns the moral struggles that history exacted—from a country and its individuals. Praise for *I Kiss Your Hands Many Times* “*I Kiss Your Hand Many Times* is the sweeping story of Marianne Szegedy-Maszak's family in pre- and post-World War II Europe, capturing the many ways the struggles of that period shaped her family for years to come. But most of all it is a beautiful love story, charting her parents' devotion in one of history's darkest hours.”—Arianna Huffington, president and editor-in-chief, the Huffington Post Media Group “In this panoramic and gripping narrative of a vanished world of great wealth and power, Marianne Szegedy-Maszak restores an important missing chapter of European, Hungarian, and Holocaust history.”—Kati Marton, author of *Paris: A Love Story and Enemies of the People: My Family's Journey to America* “How many times can a heart be broken? Hungarians know, Marianne Szegedy-Maszak's family more than most. History has broken theirs again and again. This is the story of that violence, told by the daughter of an extraordinary man and extraordinary woman who refused to surrender to it. Every perfectly chosen word is as it happened. So brace yourself. Truth can break hearts, too.”—Robert Sam Anson, author of *War News: A Young Reporter in Indochina* “This family memoir is everything you could wish for in the genre: the story of a fascinating family that illuminates the historical time it lived through. . . . Informative and fascinating in every way, [*I Kiss Your Hands Many Times*] is a great introduction to World War II Hungary and a moving tale of personal relationships in a time of great duress.”—Booklist (starred review)

The Poetry of Religious Sorrow in Early Modern England-Gary Kuchar 2011-03-03 In early modern England, religious sorrow was seen as a form of spiritual dialogue between the soul and God, expressing how divine grace operates at the level of human emotion. Through close readings of both Protestant and Catholic poetry, Kuchar explains how the discourses of 'devout melancholy' helped generate some of the most engaging religious verse of the period. From Robert Southwell to John Milton, from Aemilia Lanyer to John Donne, the language of 'holy mourning' informed how poets represented the most intimate and enigmatic aspects of faith as lived

experience. In turn, 'holy mourning' served as a way of registering some of the most pressing theological issues of the day. By tracing poetic representations of religious sorrow from Crashaw's devotional verse to Shakespeare's weeping kings, Kuchar expands our understanding of the interconnections between poetry, theology and emotion in post-Reformation England.

The Energy of Slaves-Andrew Nikiforuk 2012-08-17 "A robustly researched and smoothly written overview of the many challenges confronting our devotion to fossil fuels" from the author of *Tar Sands* (Quill & Quire). Ancient civilizations relied on shackled human muscle. It took the energy of slaves to plant crops, clothe emperors, and build cities. Nineteenth-century slaveholders viewed critics as hostilely as oil companies and governments now regard environmentalists. Yet the abolition movement had an invisible ally: coal and oil. As the world's most versatile workers, fossil fuels replenished slavery's ranks with combustion engines and other labor-saving tools. Since then, cheap oil has transformed politics, economics, science, agriculture, and even our concept of happiness. Many North Americans today live as extravagantly as Caribbean plantation owners. We feel entitled to surplus energy and rationalize inequality, even barbarity, to get it. But endless growth is an illusion. In this provocative book, Andrew Nikiforuk, winner of the Rachel Carson Environment Book Award, argues that what we need is a radical emancipation movement that ends our master-and-slave approach to energy. We must learn to use energy on a moral, just, and truly human scale. Published in Partnership with the David Suzuki Institute "In his cautionary tale about the evils of oil . . . Nikiforuk makes his case for impending doom if we don't mend our energy-spending ways." —The Star "In this cogently argued book, Andrew Nikiforuk deploys a powerful metaphor. Oil dependency, he writes, is a modern form of slavery—and it's time for a global abolition movement." —Taras Grescoe, author of *Shanghai Grand* "A startling critique that should rouse us from our pipe dream of endless plenty." —Ronald Wright, author of *On Fiji Islands*

Trump on the Couch-Justin A. Frank, MD 2018-09-25 "A great public service--critical for our time." --Bandy X. Lee, M.D., M.Div., Yale psychiatrist, expert on violence, and editor of *The Dangerous Case of Donald Trump* The New York Times-bestselling author of *Bush on the Couch* shows that Donald Trump is mentally and emotionally unfit to execute the duties of President. No president in the history of the United States has inspired more alarm and confusion than Donald Trump. As questions and concerns about his decisions, behavior, and qualifications for office have multiplied, they point to one primary question: Does he pose a genuine threat to our country? The American Psychiatric Association's Goldwater Rule constrains psychiatrists from offering diagnoses on public figures who are not patients and who have not endorsed such statements. But in *Trump on the Couch* Clinical Professor of Psychiatry Justin A Frank invokes the moral responsibility that compels him to speak out and present a full portrait of a man who presents us with a clear and present danger. Using observations gained from a close study of Trump's patterns of thought, action, and communication, Dr. Frank uncovers a personality riddled with mental health issues. His analysis is filled with important revelations about our nation's leader, including disturbing insights into his childhood, his family, his business dealings, and his unusual relationship with alternative facts, including how

- The absence of a strong maternal force during childhood has led to Trump's remarkable lack of empathy and disregard for women's boundaries;
- His compulsion to polarize America has grown out of the way he perceives the world as full of deceitful and destructive persecutors;
- His inability to tolerate the pain of frustration has triggered his belief that omnipotence will finally remove it;
- His idiosyncratic use of language points to larger issues than even his tweets might suggest.

With our country itself at stake, Dr. Frank calls attention to the underlying narcissism, misogyny, deception, and racism that drive the President who endangers it. A penetrating examination of how we as a nation got here and, more important, where we are going, *Trump on the Couch* sounds a call to action that we cannot ignore.

Undoing Ethics-Natasha Whiteman 2012-01-06 Over the past decade, researchers from different academic disciplines have paid increasing attention to the productivity of online environments. The ethical underpinnings of research in such settings, however, remain contested and often controversial. As traditional debates have been reignited by the need to respond to the particular characteristics of technologically-mediated environments, researchers have entered anew key debates regarding the moral, legal and regulative aspects of research ethics. A growing trend in this work has been towards the promotion of localized and contextualized research ethics - the suggestion that the decisions we make should be informed by the nature of the environments we study and the habits/expectations of participants within them. Despite such moves, the relationship between the empirical, theoretical and methodological aspects of Internet research ethics remains underexplored. Drawing from ongoing sociological research into the practices of media cultures online, this book provides a timely and distinctive response to this need. This book explores the relationship between the production of ethical stances in two different contexts: the ethical manoeuvring of participants within online media-fan communities and the ethical decision-making of the author as Internet researcher, manoeuvring, as it were, in the academic community. In doing so, the book outlines a reflexive framework for exploring research ethics at different levels of analysis; the empirical settings of research; the theoretical perspectives which inform the researcher's objectification of the research settings; and the methodological issues and practical decisions that constitute the activity as research. The analysis of these different levels develops a way of thinking about ethical practice in terms of stabilizing and destabilizing moves within and between research and researched communities. The analysis emphasizes the continuities and discontinuities between both research practice and online media-fan activity, and social activity in on and offline environments.

Self-images-André Rival 1995 Andre Rival, at home in both Paris and Berlin, has created a fascinating project out of a relatively simple idea: 100 women taking photographs of themselves. The outcome is both startling and impressive. It is an expression of contemporary female identity - self-aware, distinctive and thoroughly positive, in a series of nude photographs that inexorably capture and hold our attention, revealing at the same time the artist's highly creative approach to the medium of photography and to the individual selves of the women portrayed. The author describes his project in this way: "We are inundated with pictures of women in the media. Ordinarily, the pictures we see seek to achieve a kind of 'sameness' based on unwritten ideals of beauty; physical perfection, total fitness become the determining factors. These images of women, provoked as they are by the media industry, awakened in me the urge to confront both that industry and myself with something else. I chose to set aside my own ways of thinking and do a series of 100 women in which it was not I who would put together the photographs, but the women themselves. For this purpose, I gave them each a shutter-switch and left the room. That represented the beginning of the attempt to enable the women to become photographic subjects rather than objects; they were left to decide on their own which personal image of themselves they wanted to convey. The conditions were the same for all of the women: the same lighting, the same white background and the same unchanged camera position. It was essential to fix the location of the camera, so that the women did not perceive themselves as being pursued by an 'observer'; instead, they were able to establish distance and camera angle themselves with the aid of a video screen that showed them each camera exposure as a still photo."
