Black Edge—Sheelah Kolhatkar 2017-02-07 NEW YORK TIMES BESTSELLER • A riveting, true-life legal thriller about the government’s pursuit of billionaire hedge fund manager Steven Cohen and his employees at SAC Capital—a revelatory look at the power and wealth of Wall Street ONE OF THE BEST BOOKS OF THE YEAR—The New York Times and The Economist • “An essential exposé of our times—a work that reveals the deep rot in our financial system . . . Everyone should read this book.”—David Grann, author of Killers of the Flower Moon Steven A. Cohen changed Wall Street. He and his fellow pioneers of the hedge fund industry didn’t lay railroads, build factories, or invent new technologies. Rather, they made their billions through financial speculation, by placing bets in the market that turned out to be right more often than not. Cohen was revered as one of the greatest traders who ever lived. But that image was shattered when his fund, SAC Capital, became the target of a seven-year government investigation. Prosecutors labeled SAC a “magnet for market cheaters” whose culture encouraged the relentless pursuit of “edge”—and even “black edge,” which is inside information—and the firm was ultimately indicted and pleaded guilty to charges related to a vast insider trading scheme. Cohen, himself, however, was never charged. Black Edge raises urgent and troubling questions about those who sit at the pinnacle of high finance and how they have reshaped the economy. Finalist for the New York Public Library’s Helen Bernstein Book Award for Excellence in Journalism • Longlisted for the Andrew Carnegie Medal for Excellence in Nonfiction and the Financial Times and McKinsey Business Book of the Year Award

30 Things Every Woman Should Have and Should Know by the Time She's 30-Pamela Redmond Satran
2012-04-24 Featuring advice, wisdom, and observations from an array of prominent and beloved women, 30 Things Every Woman Should Have and Should Know by the Time She's 30 is an essential guide (and perfect gift) for women on the brink of thirty--and for those who are already there! Fifteen years ago, Glamour

published a list of distinctive yet universally true must-haves and must-knows for women on the cusp of and beyond the age of thirty titled, "30 Things Every Woman Should Have and Should Know by the Time She's 30." It became a phenomenon. Originally penned by Glamour columnist Pamela Redmond Satran, The List found a second life when women began to forward it to one another online, millions of times. It became a viral sensation, misattributed to everyone from Maya Angelou to Hillary Clinton--but there's only one original list, and it stands the test of time. Quirky and profound, The List defines the absolute must-haves (#11: "A set of screwdrivers, a cordless drill, and a black lace bra") and must-knows (#1: "How to fall in love without losing yourself") for grown-up female happiness. Now, Glamour magazine has gathered together its editors and an incredible group of notable women to expand on each of the items on The List in wise, thoughtful, and intimate essays. Kathy Griffin meditates on knowing when to try harder and when to walk away. Lisa Ling explores the idea that your childhood may not have been perfect, but it's over, and Lauren Conrad shares what she has learned about what she would and wouldn't do for money or love. Other personal insights come from Maya Angelou, Rachel Zoe, Taylor Swift, Katie Couric, Portia de Rossi, Kelly Corrigan, ZZ Packer, Bobbi Brown, Padma Lakshmi, Angie Harmon, and many more. Along with essays based on The List, writers share their feelings about what the milestone of turning thirty meant to them. 30 Things Every Woman Should Have and Should Know by the Time She's 30 is the one book women of all ages will turn to for timely and timeless wisdom.

Power Management in Mobile Devices-Findlay Shearer
2011-04-01 Sealed Lead Acid...Nickel Cadmium...Lithium Ion... How do you balance battery life with performance and cost? This book shows you how! Now that "mobile" has become the standard, the consumer not only expects mobility but demands power longevity in wireless devices. As more and more features, computing power, and memory

are packed into mobile devices such as iPods, cell phones, and cameras, there is a large and growing gap between what devices can do and the amount of energy engineers can deliver. In fact, the main limiting factor in many portable designs is not hardware or software, but instead how much power can be delivered to the device. This book describes various design approaches to reduce the amount of power a circuit consumes and techniques to effectively manage the available power. Power Management Advice On: •Low Power Packaging Techniques •Power and Clock Gating •Energy Efficient Compilers •Various Display Technologies •Linear vs. Switched Regulators •Software Techniques and Intelligent Algorithms * Addresses power versus performance that each newly developed mobile device faces * Robust case studies drawn from the author's 30 plus years of extensive real world experience are included * Both hardware and software are discussed concerning their roles in power

When programs are written in the recommended style they can be transformed into documents by a document compiler and into efficient code by an algebraic compiler. This anthology of essays includes Knuth's early papers on related topics such as structured programming as well as the Computer Journal article that launched literate programming. Many examples are given, including excerpts from the programs for TeX and METAFONT. The final essay is an example of CWEB, a system for literate programming in C and related languages.
