**Stand Firm**-Paul Gould 2018-11 In an age of skepticism and disenchantment, people long for something that satisfies our mind's search for truth and our heart's desire for beauty and meaning. Stand Firm: Apologetics and the Brilliance of the Gospel argues that the gospel satisfies both of these needs. It is true and rational, but it is also inherently attractive and provides meaning and purpose. In short, the gospel is brilliant. It is brilliant, in one sense, because of the broad variety of evidences for its truth. But it is also brilliant given its beauty, goodness and the meaningful life it offers. The book provides up to date responses to questions about the existence of God, the reliability of the Bible, Jesus and the resurrection, and the problem of evil. It also treats unique topics such as understanding truth, knowledge and faith, the claims of alternate faiths, religious disagreement, etc. Each chapter attempts to connect these considerations with the gospel so that we may stand firm in our faith.

## **Research Companion to Corruption in Organizations-**

Ronald J. Burke 2009-01-01 This is a very timely book. The coverage it gives to the topic is superb. The individual, organisational and institutional causes of corruption are laid

out along with analyses of the choices that we all have to make to deal with its consequences. In these times of increased scouting of corporate behaviour, there is something to learn here for policy makers, corporate leaders and researchers alike. Paul Sparrow, Lancaster University, UK Ronald Burke and Cary Cooper have assembled the most comprehensive volume of work available today on the topic of organizational corruption. However, the volume is far-reaching in more than just its content. In addition to attracting some of the most widely-read scholars in the area, Burke and Cooper have found space for a number of bright new voices and thus, insights as well. This makes for a volume that is as vibrant and exciting as it is complete. Scholars not only should read it, they will enjoy doing so. Marshall Schminke, University of Central Florida, US

Corruption in organizations is creating an increasing number of victims and causing huge costs. This timely book brings together international researchers who address the causes and consequences of corruption in organizations and the action needed to reduce levels of corruption worldwide. Corruption is a worldwide problem and is likely to increase as a result of the current economic meltdown. Specific attention is devoted to causes of corruption such as individual levels of moral development, moral disengagement, greed, the routinisation of corruption, and organizational factors such as conflicts of interest, reward systems and organizational cultural values. The Companion suggests methods and examples to reduce levels of corruption that include education and training, whistleblowing, the increase of organizational controls through rules and structure, and developing an ethical

organizational culture. Academics and postgraduate students interested in both crime and corruption in organizations will warmly welcome the Companion. Policymakers in government, those involved in professional services such as accountants and lawyers, as well as managers of any organization interested in conducting ethical business will find the Companion invaluable.

**Gendered Compromises**-Karin Alejandra Roseblatt 2003-06-19 With this book, Karin Roseblatt presents a gendered history of the politics and political compromise that emerged in Chile during the 1930s and 1940s, when reformist popular-front coalitions held power. While other scholars have focused on the economic realignments and novel political pacts that characterized Chilean politics during this era, Roseblatt explores how gender helped shape Chile's evolving national identity. Roseblatt examines how and why the aims of feminists, socialists, labor activists, social workers, physicians, and political leaders converged around a shared gender ideology. Tracing the complex negotiations surrounding the implementation of new labor, health, and welfare policies, she shows that professionals in health and welfare agencies

sought to regulate gender and sexuality within the working class and to consolidate the male-led nuclear family as the basis of societal stability. Leftists collaborated in these efforts because they felt that strong family bonds would generate a sense of class belonging and help unify the Left, while feminists perceived male familial responsibility as beneficial for women. Diverse actors within civil society thus reworked the norms of masculinity and femininity developed by state agencies and political leaders--even as others challenged those ideals.

**The British Pop Dandy**- 2017-07-05 Who are pop dandies? Why are stars like David Bowie, Jarvis Cocker, Pete Doherty and Robbie Williams so dandified? Taking up a wide range of British pop stars, Hawkins seeks to find out why so many have cast themselves in roles that often take style to absurd extremes. In this study, male pop artists are mapped against a cultural and historical background through a genealogy of personalities, such as Oscar Wilde, W.H. Auden, Andy Warhol, Noël Coward, Derek Jarman, David Beckham and countless others. A critical analysis of issues and approaches to musical performance through masculinity becomes the focal point of this fascinating study. Ranging from the sixties to beyond the twentieth century, *The British Pop Dandy* considers the construction of the male pop icon through the spectacle of videos, live concerts and films. Why do we derive pleasure from the performing body, and how is entertainment linked to categories of gender and sexuality? The author insists that pop performances can be understood through human characteristics that relate to the particulars

of dandyism, camp and glamour, and this he theorizes through the work of Charles Baudelaire. One of the political objectives of the dandy is to liberate himself through a denial of the structures that assume fixed identity. Not least, it is acts of queering in pop music that characterize entire generations of male artists in the UK. Setting out to discover what distinguishes the British pop dandy, Hawkins considers the role of music and performance in the articulation of hyperbolic display. It is argued that the recorded voice is a construction that idealizes self-representation, and absorbs the listener's attention. Particularly, camp address in singing practice is taken up in conjunction with a discussion of intimacy, which forms part of the strategy of the performer. In a range of songs and videos selected for music analysis, Hawkins points to the uniqueness of the voice as it expresses a transgressive quali

**Logos Arete**-Daniel Lee Baumgartner Sr 2008-08 It is the intent of this text to allow a more in-depth study to be made by the student of Greek history by having the essential data more readily available in this spreadsheet format. The pursuit of one's objective can be much more easily and quickly carried out if the student's train of thought can be maintained until the time that his final conclusions can be reached. The intent is not to give a thoroughly complete encyclopedic source of information about Greek history as that type of data is readily available in any public library. Once the names of the character, his point of fame, his family relationships and his place of birth, etc. are known, it will be much easier to find source material from virtually

hundreds, if not thousands, of texts that have a treasure-trove of information that is not always being used because of the complexity involved in finding it. What this writer is doing in this text is giving the reader an introduction to the important characters of Greek history in much the same way we find out about a person we might meet at a party, exchanging general personal information like, "What Do You Do For a Living?" or "Are You Married?" and so forth. In addition, he has taken the liberty to assess the relative importance of each notable ancient Greek so that the reader's effort might be spent in a more beneficial way. Latitude has been left for some healthy controversy. Since Heinrich Schliemann discovered the site of ancient Troy, the academic community has taken criticism for their doubting of the factual nature of ancient Greek history. That has gone too far. The last century and a quarter has proven that the modern archaeologist is up to the task, giving open and accurate analysis of the finds that they have made without regards to pressure to misrepresent data so preconceived theories can be allowed to stand. The modern historians have also exonerated themselves by accepting their error and by moving in the direction of open-minded

**From Broke to Broken-**Niral Russell Burnett 2003-09-01

From Broke to Broken Embracing a Life that Lacks Nothing is a spiritual journey that every Christian must take.

Whether the need is financial, health or marital, God desires that we are usable for the glory of his kingdom, and that can only be attained when we experience a true spiritual breakthrough. Breakthrough occurs when that which is on the inside comes out, as in a seed. Yet, interestingly, the same could be said of brokenness. In a church age where Christians nationwide are crying out for breakthrough, it is evident that God has sent things that bring brokenness. Still, breakthrough and brokenness are the same thing. So, why do so few cry out for brokenness? This follow-up to the critically acclaimed, *Tithing and Still Broke* will show believers what really matters, as we embrace a life that lacks nothing. Yet, when we embrace such a life, the precious things we seek will not be found in places that are pretty. They will be found in places that are dangerous

places where our security, our finances, and even our health are being challenged. Yet, these experiences are where the greatest treasures imaginable are harvested.

**Land-water Linkages in Rural Watersheds-** 2002 It is often assumed that upstream land use practices have important impacts on water resources and affect the downstream users at a watershed scale, Payments by downstream users to upstream users for "environmental services" such as good water quality, less sediments or more regular water flow are widely discussed. However, much controversy exists about the direction and magnitude of such impacts, how they influence the relationships between upstream and down-stream users, and which mechanisms allow for a sharing of resulting benefits and costs by all resource users in a watershed context. To address these issues, the FAO Land and Water Development Division organized the electronic workshop "Land-Water Linkages in Rural Watersheds" from 18 September to 27 October 2000. The present publication contains the proceedings of the workshop and two papers that set the stage for the workshop discussions. The complete workshop documentation, including discussion archive, background papers, and case studies, is included on the CD-ROM that accompanies the document.

**Why I Am An Agnostic**-Robert Green Ingersoll 2019-12-03 For the most part we inherit our opinions. We are the heirs of habits and mental customs. Our beliefs, like the fashion of our garments, depend on where we were born. We are moulded and fashioned by our surroundings. Environment is a sculptor---a painter. If we had been born in Constantinople, the most of us would have said: "There is no God but Allah, and Mohammed is his prophet." If our parents had lived on the banks of the Ganges, we would have been worshipers of Siva, longing for the heaven of Nirvana. As a rule, children love their parents, believe what they teach, and take great pride in saying that the religion of mother is good enough for them. Most people love peace. They do not like to differ with their neighbors. They like company. They are social. They enjoy traveling on the highway with the multitude. They hate to walk alone. (...)

Belief is not subject to the will. Men think as they must. Children do not, and cannot, believe exactly as they were taught. They are not exactly like their parents. They differ in temperament, in experience, in capacity, in surroundings. And so there is a continual, though almost imperceptible change. There is development, conscious and unconscious growth, and by comparing long periods of time we find that the old has been almost abandoned, almost lost in the new. Men cannot remain stationary. The mind cannot be securely anchored. If we do not advance, we go backward. If we do not grow, we decay. If we do not develop, we shrink and shrivel. - Taken from "Why Am I An Agnostic" written by Robert Green Ingersoll

**Crime, Neighborhood, and Public Housing**-Garth Davies 2006 Annotation Public housing projects, both in their structural design and sociodemographic make-up, constitute neighborhoods. Informal social control theory suggests that certain social factors differentially affect a neighborhood's ability to regulate aspects of residential life, including crime. Public housing neighborhoods do not, however, exist

in a vacuum; they are integral parts of their surrounding environments. Neighborhoods adjacent to public housing areas are likely to be affected by its proximity. At the same time, public housing is also reciprocally influenced by its immediate neighbors. Spatial autocorrelation analysis provides evidence of spatial patterning of crime in public housing and public housing neighborhoods. Generalized estimating equations reveal the presence of both outward and inward diffusion that is sometimes, but not always, mediated by sociostructural factors. The findings suggest that policies premised on deconcentration and decentralization would reduce crime in, and otherwise benefit, both public housing neighborhoods and surrounding communities.
