The ABCs of Safe & Healthy Child Care-Cynthia M. Hale 2000-01-01 This handbook was written to help child care providers reduce sickness, injury, and other health problems in their child care facility. The information applies to any child care provider in any setting, whether you take care of children in a center or in your own home. It includes: how infectious diseases are spread; what you can do to keep yourself and the children in your care healthy; what disease and injury prevention practices you should follow; what disease and injury prevention practices you should require parents to follow; and what the most common childhood diseases and health conditions are, and how to recognize them, and what you can do when they occur.

Child and Adult Care Food Program-Institute of Medicine 2011-06-06 The Child and Adult Care Food Program (CACFP) is a federally-funded program designed to provide healthy meals and snacks to children and adults while receiving day care at participating family day care homes, traditional child care centers, afterschool facilities, adult care facilities, and emergency shelters. CACFP has the broadest scope of any of the U.S. Department of Agriculture (USDA) food program, serving more than 3 million children and 114,000 adults across the nation. To receive reimbursement for the foods served, participating programs must abide by requirements set by the USDA. Child and Adult Care Food Program assesses the nutritional needs of the CACFP population based on Dietary Guidelines for Americans and the Dietary Reference Intakes (DRIs) and makes recommendations for revisions to the CACFP meal requirements. The book outlines meal requirements that include food specifications that could be used for specific meals and across a full day, covering all age groups from infants to older adults and meal patterns designed for use in a variety of settings, including in-home care and in large centers. By implementing these meal requirements, consumption of fruits, vegetables, and whole-grain rich foods will increase while consumption of solid fats, added sugars, and sodium will decrease. Not only will this address the high prevalence of childhood obesity, it will also help to achieve consistency with the standards and regulations of other USDA nutrition assistance programs, particularly the Supplemental Nutrition Program for Women, Infants, and Children (WIC), and the National School Lunch and School Breakfast programs. Child and Adult Care Food Program makes practical recommendations that would bring CACFP meals and snacks into alignment with current dietary guidance. The book will serve as a vital resource for federal and state public health officials, care providers working in child and adult day care facilities, WIC agencies, officials working with the National School Lunch and School Breakfast programs, and other organizations serving at-risk populations.

The Last Days of New Paris-China Miéville 2016-08-09 A thriller of war that never was—of survival in an impossible city—of surreal cataclysm. In *The Last Days of New Paris*, China Miéville entwines true historical events and people with his daring, uniquely imaginative brand of fiction, reconfiguring history and art into something new. “Beauty will be convulsive. . . .” 1941. In the chaos of wartime Marseille, American engineer—and occult disciple—Jack Parsons stumbles onto a clandestine anti-Nazi group, including Surrealist theorist André Breton. In the strange games of the dissident diplomats, exiled revolutionaries, and avant-garde artists, Parsons finds and channels hope. But what he unwittingly unleashes is the power of dreams and nightmares, changing the war and the world forever. 1950. A lone Surrealist fighter, Thibaut, walks a new, hallucinogenic Paris, where Nazis and the Resistance are trapped in unending conflict, and the streets are stalked by living images and texts—and by the forces of Hell. To escape the city, he must join forces with Sam, an American photographer intent on recording the ruins, and make common cause with a powerful, enigmatic figure of chance and rebellion: the exquisite corpse. But Sam is being hunted. And new secrets will emerge that will test all their loyalties—to each other, to Paris old and new, and to reality itself. Praise for *The Last Days of New Paris* “Beautiful, stunningly realized . . . [The Last Days of New Paris] is a brief vacation in alien latitudes, a midnight layover in an imaginary place.”—NPR “A thoughtful, highbrow novella . . . Miéville’s self-assured style offers up a strong sense of humanity, while the strange Surrealist monsters give Last Days a fun and complementary mad-science component.”—USA Today “[A] testament to the necessary, progressive power of art . . . Both moving and disturbingly timely.”—Newsday “A novel both unhinged and utterly compelling, a kind of guerrilla warfare waged by art itself, combining both meticulous historical research and Miéville’s unparalleled inventiveness.”—Chicago Tribune “An extraordinarily original work that foregrounds Miéville’s considerable ingenuity and innovation.”—The Millions “Hauntingly poetic, strangely beautiful, and erratically intense.”—San Francisco Book Review “Dazzling . . . quite a feat.”—The Guardian

Early Childhood Obesity Prevention Policies-Institute of Medicine 2011-10-31 Childhood obesity is a serious health problem that has adverse and long-lasting consequences for individuals, families, and communities. The magnitude of the problem has increased dramatically during the last three decades and, despite some indications of a plateau in this growth, the numbers remain stubbornly high. Efforts to prevent childhood obesity to date have focused largely on school-aged children, with relatively little attention to children under age 5. However, there is a growing awareness that efforts to prevent childhood obesity must begin before children ever enter the school system. *Early Childhood Obesity Prevention Policies* reviews factors related to overweight and obese children from birth to age 5, with a focus on nutrition, physical activity, and sedentary behavior, and recommends policies that can alter children's environments to promote the maintenance of healthy weight. Because the first years of life are important to health and well-being throughout the life span, preventing obesity in infants and young children can contribute to reversing the epidemic of obesity in children and adults. The book recommends that health care providers make parents aware of their child's excess weight early. It also suggests that parents and child care providers keep children active throughout the day, provide them with healthy diets, limit screen time, and ensure children get adequate sleep. In addition to providing comprehensive solutions to tackle the problem of obesity in infants and young children, *Early Childhood Obesity Prevention Policies* identifies potential actions that could be taken to implement those recommendations. The recommendations can inform the decisions of state and local child care regulators, child care providers, health care providers, directors of federal and local child care and nutrition programs, and government officials at all levels.

WIC Food Packages-Institute of Medicine 2006-01-28 The Special Supplemental Nutrition Program for Women, Infants, and Children (the WIC program) has promoted the health of low-income families for more than 30 years by providing nutrition education, supplemental food, and other valuable services. The program reaches millions of families every year, is one of the largest nutrition programs in the United States, and is an important investment in the nation's health. The U.S. Department of Agriculture charged the Institute of Medicine with creating a committee to evaluate the WIC food packages (the list of specific foods WIC participants obtain each month). The goal of the study was to improve the quality of the diet of WIC participants while also promoting a healthy body weight that will reduce the risk of chronic diseases. The committee concluded that it is time for a change in the WIC food packages and the book provides details on the proposed new food packages, summarizes how the proposed packages differ from current packages, and discusses the rationale for the proposed packages.
