Scott Foresman Science- 2003

Where We Live 4: Teacher's Guidebook-Sylvia Hill 1986 This book provides valuable background resources for use with the books in the Where We Live series of readers. Intended for use with the five titles in the Where We Live series--Cedric and the North End Kids, What's a Friend? , About Nellie and Me, Marco and Michela, The Golden Hawks--the guidebook features four-part lesson plans, scope and sequence charts, reproducible blackline masters and annotated bibliography. Where We Live 4 is a useful teaching tool supporting a great series of books for Canadian children.

Resources for Teaching Middle School Science-Smithsonian Institution 1998-03-30 With age-appropriate, inquiry-centered curriculum materials and sound teaching practices, middle school science can capture the interest and energy of adolescent students and expand their understanding of the world around them. Resources for Teaching Middle School Science, developed by the National Science Resources Center (NSRC), is a valuable tool for identifying and selecting effective science curriculum materials that will engage students in grades 6 through 8. The volume describes more than 400 curriculum titles that are aligned with the National Science Education Standards. This completely new guide follows on the success of Resources for Teaching Elementary School Science, the first in the NSRC series of annotated guides to hands-on, inquiry-centered curriculum materials and other resources for science teachers. The curriculum materials in the new guide are grouped in five chapters by scientific area--Physical Science, Life Science, Environmental Science, Earth and Space Science, and Multidisciplinary and Applied Science. They are also grouped by type--core materials, supplementary units, and science activity books. Each annotation of curriculum material includes a recommended grade level, a description of the activities involved and of what students can be expected to learn, a list of accompanying materials, a reading level, and ordering information. The curriculum materials included in this book were selected by panels of teachers and scientists using evaluation criteria developed for the guide. The criteria reflect and incorporate goals and principles of the National Science Education Standards. The annotations designate the specific content standards on which these curriculum pieces focus. In addition to the curriculum chapters, the guide contains six chapters of diverse resources that are directly relevant to middle school science. Among these is a chapter on educational software and multimedia programs, chapters on books about science and teaching, directories and guides to science trade books, and periodicals for teachers and students. Another section features institutional resources. One chapter lists about 600 science centers, museums, and zoos where teachers can take middle school students for interactive science experiences. Another chapter describes nearly 140 professional associations and U.S. government agencies that offer resources and assistance. Authoritative, extensive, and thoroughly indexed--and the only guide of its kind--Resources for Teaching Middle School Science will be the most used book on the shelf for science teachers, school administrators, teacher trainers, science curriculum specialists, advocates of hands-on science teaching, and concerned parents.

Going Places-Leonard Martelli 1983 Reproducible masters from Teacher's resource notebook. For use with text series on physical and cultural geography emphasizing the United States.

Teacher's Manual for Government in the United States, Richard C. Remy, Senior Author, Larry Elowitz, William Berlin-Jean Craven 1984

Research-Based Methods of Reading Instruction, Grades K-3-Sharon Vaughn Vaughn 2004-08-15 What does research tell us about how teachers can most effectively help young students learn to read? In Research-Based Methods of Reading Instruction, Grades K-3, Sharon Vaughn and Sylvia Linan-Thompson explore the research on reading, providing a comprehensive overview of the five core instructional areas and how each affects student achievement: *Phonemic awareness *Phonics and Word Study *Fluency *Vocabulary *Comprehension The authors include dozens of reading activities and lesson plans that teachers can use immediately, all of which have worked in actual classrooms and are grounded in solid research. A glossary and annotated resource lists will help you better understand key reading concepts and find reliable resources, including relevant Web sites. Whether your students have special needs or show no apparent learning difficulties, this book will expand your repertoire of teaching strategies and help you put students on the road to literacy.
