Workspaces – Blender Manual

Blender's flexibility with Areas lets you create customized workspaces for different tasks such as modeling, animating, and scripting. It is often useful to quickly switch between different workspaces within the same file. Compositing. Combining and post-processing of images and rendering information. Geometry Nodes. For procedural

Blender™ | Radeon™ ProRender | AMD

AOVs for post processing including support for world coordinates, UVs, material index, geometric normals, shading normal, reflections, and diffuse lighting. Lightgroup AOVS called environment, key, fill, and emissive allow you to independently control light values when compositing your render.

Why is blender crashing when trying to render? - Blender

May 23, 2018 · You have 3 different render layers that you want to render simultaneously. Blender has to cache the information of every layer separately and keep it available for compositing. A workaround is to render each of the layers separately, save it as an EXR file and combine them later in the compositor or other compositing app.
