

Blank Data Chart Template

Hands-On Data Visualization-Jack Dougherty 2021-03-11 Tell your story and show it with data, using free and easy-to-learn tools on the web. This introductory book teaches you how to design interactive charts and customized maps for your website, beginning with simple drag-and-drop tools such as Google Sheets, Datawrapper, and Tableau Public. You'll also gradually learn how to edit open source code templates like Chart.js, Highcharts, and Leaflet on GitHub. Hands-On Data Visualization takes you step-by-step through tutorials, real-world examples, and online resources. This practical guide is ideal for students, nonprofit organizations, small business owners, local governments, journalists, academics, and anyone who wants to take data out of spreadsheets and turn it into lively interactive stories. No coding experience is required. Build interactive charts and maps and embed them in your website Understand the principles for designing effective charts and maps Learn key data visualization concepts to help you choose the right tools Convert and transform tabular and spatial data to tell your data story Edit and host Chart.js, Highcharts, and Leaflet map code templates on GitHub Learn how to detect bias in charts and maps produced by others

The Executive Function Guidebook-Roberta Strosnider 2019-03-22 Teach some of the most important skills your students will ever need! Executive function skills—including self-regulation, focus, planning, and time-management—are essential to student success, but they must be taught and practiced. This unique guidebook provides a flexible seven-step model, incorporating UDL principles and the use of metacognition, for making executive-function training part of your classroom routine at any grade level. Features include: Descriptions of each skill and its impact on learning Examples of instructional steps to assist students as they set goals and work to achieve success. Strategies coded by competency and age/grade level Authentic snapshots and “think about” sections Templates for personalized goal-setting, data collection, and success plans Accompanying strategy cards

Managing Data Using Excel-Mark Gardener 2015-03-16 Microsoft Excel is a powerful tool that can transform the way you use data. This book explains in comprehensive and user-friendly detail how to manage, make sense of, explore and share data, giving scientists at all levels the skills they need to maximize the usefulness of their data. Readers will learn how to use Excel to: * Build a dataset - how to handle variables and notes, rearrangements and edits to data. * Check datasets - dealing with typographic errors, data validation and numerical errors. * Make sense of data - including datasets for regression and correlation; summarizing data with averages and variability; and visualizing data with graphs, pivot charts and sparklines. * Explore regression data - finding, highlighting and visualizing correlations. * Explore time-related data - using pivot tables, sparklines and line plots. * Explore association data - creating and visualizing contingency tables. * Explore differences - pivot tables and data visualizations including box-whisker plots. * Share data - methods for exporting and sharing your datasets, summaries and graphs. Alongside the text, Have a Go exercises, Tips and Notes give readers practical experience and highlight important points, and helpful self-assessment exercises and summary tables can be found at the end of each chapter. Supplementary material can also be downloaded on the companion website. Managing Data Using Excel is an essential book for all scientists and students who use data and are seeking to manage data more effectively. It is aimed at scientists at all levels but it is especially useful for university-level research, from undergraduates to postdoctoral researchers.

Critical Thinking and Formative Assessments-Todd Stanley 2013-09-05 Develop your students' critical thinking skills and prepare them to perform competitively in the classroom, on state tests, and beyond. In this book, Moore and Stanley show you how to effectively instruct your students to think on higher levels, and how to assess their progress. As states implement the Common Core State Standards, teachers have been called upon to provide higher levels of rigor in their classrooms. Moore and Stanley demonstrate critical thinking as a key approach to accomplishing this goal. They explore the benefits of critical thinking and provide the tools you need to develop and monitor critical thinking skills in the classroom. Topics include: The Difference Between Higher-Level and Lower-Level Thinking Writing Higher-Level Thinking Questions Assessing Critical Thinking Strategies to Develop Higher-Level Thinking Skills

Reasoning Web. Semantic Technologies for the Web of Data-Axel Polleres 2011-08-09 The Semantic Web aims at enriching the existing Web with meta-data and processing methods so as to provide web-based systems with advanced capabilities, in particular with context awareness and decision support. The objective of this book is to provide a coherent introduction to semantic web methods and research issues with a particular emphasis on reasoning. The 7th reasoning web Summer School, held in August 2011, focused on the central topic of applications of reasoning for the emerging “Web of Data”. The 12 chapters in the present book provide excellent educational material as well as a number of references for further reading. The book not only addresses students working in the area, but also those seeking an entry point to various topics related to reasoning over Web data.

Excel Hacks-David Hawley 2007-06-20 Millions of users create and share Excel spreadsheets every day, but few go deeply enough to learn the techniques that will make their work much easier. There are many ways to take advantage of Excel's advanced capabilities without spending hours on advanced study. Excel Hacks provides more than 130 hacks -- clever tools, tips and techniques -- that will leapfrog your work beyond the ordinary. Now expanded to include Excel 2007, this resourceful, roll-up-your-sleeves guide gives you little known "backdoor" tricks for several Excel versions using different platforms and external applications. Think of this book as a toolbox. When a need arises or a problem occurs, you can simply use the right tool for the job. Hacks are grouped into chapters so you can find what you need quickly, including ways to: Reduce workbook and worksheet frustration -- manage how users interact with worksheets, find and highlight information, and deal with debris and corruption. Analyze and manage data -- extend and automate these features, moving beyond the limited tasks they were designed to perform. Hack names -- learn not only how to name cells and ranges, but also how to create names that adapt to the data in your spreadsheet. Get the most out of PivotTables -- avoid the problems that make them frustrating and learn how to extend them. Create customized charts -- tweak and combine Excel's built-in charting capabilities. Hack formulas and functions -- subjects range from moving formulas around to dealing with datatype issues to improving recalculation time. Make the most of macros -- including ways to manage them and use them to extend other features. Use the enhanced capabilities of Microsoft Office 2007 to combine Excel with Word, Access, and Outlook. You can either browse through the book or read it from cover to cover, studying the procedures and scripts to learn more about Excel. However you use it, Excel Hacks will help you increase productivity and give you hours of "hacking" enjoyment along the way.

SmartDraw For Dummies-Daniel G. Hoffmann 2009-04-29 Diagrams, organizational charts, flowcharts, even floor plans — they're all types of business graphics. Only one tool does 'em all: SmartDraw. SmartDraw For Dummies shows you how this business graphics software helps you make boring presentations exciting and how to create graphics that can help you sell, manage, inform, motivate, and more. You'll learn how to set up the program, navigate its somewhat unique interface, and work with SmartDraw's thousands of templates. You don't need artistic talent, just this handy guide and the extended, fully functional trial version of SmartDraw that's on the bonus CD! Use SmartDraw templates to create org charts, flowcharts, express charts, mind maps, Live Maps, and more Dress up your graphics with color, effects, and design themes Learn to integrate your graphics into Microsoft Office applications and animate graphics for cool PowerPoint presentations Explore SmartDraw diagrams for Web pages and e-mail newsletters Import SmartDraw graphics into Word and Excel documents Take advantage of extra software and additional templates, sample drawings and flowcharts, image editing tools, maps, and flyers on the CD You'll also find graphics guidelines to help you create more effective charts and presentations, plus tips on using color and images to your advantage. Written by a Microsoft PowerPoint MVP and a SmartDraw vice president, SmartDraw For Dummies helps you banish boring charts forever! Note: CD-ROM/DVD and other supplementary materials are not included as part of eBook file.

Excel 2013: The Missing Manual-Matthew MacDonald 2013-04-18 The world's most popular spreadsheet program is now more powerful than ever, but it's also more complex. That's where this Missing Manual comes in. With crystal-clear explanations and hands-on examples, Excel 2013: The Missing Manual shows you how to master Excel so you can easily track, analyze, and chart your data. You'll be using new features like PowerPivot and Flash Fill in no time. The important stuff you need to know: Go from novice to ace. Learn how to analyze your data, from writing your first formula to charting your results. Illustrate trends. Discover the clearest way to present your data using Excel's new Quick Analysis feature. Broaden your analysis. Use pivot tables, slicers, and timelines to examine your data from different perspectives. Import data. Pull data from a variety of sources, including website data feeds and corporate databases. Work from the Web. Launch and manage your workbooks on the road, using the new Excel Web App. Share your worksheets. Store Excel files on SkyDrive and collaborate with colleagues on Facebook, Twitter, and LinkedIn. Master the new data model. Use PowerPivot to work with millions of rows of data. Make calculations. Review financial data, use math and scientific formulas, and perform statistical analyses.

Managing for Quality and Performance Excellence-James R. Evans 2016-01-01 The definitive market leader and authoritative educational reference, MANAGING FOR QUALITY AND PERFORMANCE EXCELLENCE, 10e provides unmatched coverage and insightful comparisons that guide students through the intricacies of quality management. Built upon the strength and proven experience of well-known authors and examiners for the Malcolm Baldrige Award, this text presents the fundamental principles and historical foundations of total quality with an emphasis on high-performance management practices. It offers unparalleled coverage of ISO 9000 certification standards, Six Sigma, and the U.S. Malcolm Baldrige National Quality Award standards. Current examples from leading organizations throughout the world emphasize the practical aspects of the book's managerial focus as well as the technical topics that students are learning. Coverage of most of the Body of Knowledge required for ASQ certification helps students prepare to become Certified Quality Managers. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

To create as complete a chart as possible and interpret to gain a full understanding of all elements, taking note of all data relative to: planets in the signs planets in the houses houses in the signs how they relate to the aspects There are both practical and significant uses of the aspects of astrology which reveal much more than the average summarised horoscope. This book of blank charts is a handy tool to compliment your astrology books and guides, whether you are a beginner or experienced astrologer. 60 blank charts to map your data and allow your interpretations to be more informed and recorded.

Be Your Own Astrologer-Paul Wade 2006 Provides step-by-step instructions on how to calculate, draw and interpret one's birth chart, enabling readers to gain insights into their personality and provide guidance on their career, health, and relationships.

Office 2013: The Missing Manual-Nancy Conner 2013-05-22 Microsoft Office is the most widely used productivity software in the world, but most people just know the basics. This helpful guide gets you started with the programs in Office 2013, and provides lots of power-user tips and tricks when you're ready for more. You'll learn about Office's new templates and themes, touchscreen features, and other advances, including Excel's Quick Analysis tool. The important stuff you need to know: Create professional-looking documents. Use Word to craft reports, newsletters, and brochures for the Web and desktop. Stay organized. Set up Outlook to track your email, contacts, appointments, and tasks. Work faster with Excel. Determine the best way to present your data with the new Quick Analysis tool. Make inspiring presentations. Build PowerPoint slideshows with video and audio clips, charts and graphs, and animations. Share your Access database. Design a custom database and let other people view it in their web browsers. Get to know the whole suite. Use other handy Office tools: Publisher, OneNote, and a full range of Office Web Apps. Create and share documents in the cloud. Upload and work with your Office files in Microsoft's SkyDrive.

Spreadsheet Magic-Pamela Lewis 2006 Step-by-step instructions for using spreadsheets to teach students in kindergarten through sixth grade. Lessons cover a variety of subject areas: language arts, social studies, science, music, and mathematics.

Measures of Success-Mark Graban 2019-03-11 A 260-page, full-color book that will help you: STOP REACTING TO NOISE. START RESPONDING TO SIGNALS. Measures of Success shows business leaders how. A PRACTICAL GUIDE FOR HOW TO MANAGE YOUR METRICS Organizations depend on metrics for their business. Question is, are they helping people do the right things? Or, encouraging them to overreact to every uptick, downturn, and change? In other words, reacting to noise. Noise is present in every metric. But, it's our reaction to noise that causes waste and stress. Too often, people don't recognize this. Like feeling stuck on a rollercoaster you no longer enjoy. We do and explain things that don't help us improve. At the cost of doing things that do. No need to be jittery about every change in a metric. Not by a long shot. Measures of Success shows a better way to chart and manage your metrics, in any organization or setting. For your business processes and activities, you need to know what's working, what's not, and what to change. And why. Then, you can determine what to stop doing, what to start doing, what to keep doing. So you can... Jump off the metrics rollercoaster, by responding to signals. Systematically. Sustainably. Learn how to identify meaningful signals in a metric. To respond just right. Or perhaps, not at all. You'll learn how with methods easy to understand, making it obvious what activities to do next. Loads of vivid stories and clear examples from healthcare, software companies, and more. With compelling case studies from the news and personal lives, too. "What gets measured gets managed." We've all heard that. But did you ever learn how to manage a metric? This ain't about gaming the system or fudging the numbers. This is about delivering real value, understood by everyone, and proven with data. Learn a better way to manage your measures. WHO IS MEASURES OF SUCCESS FOR? EXECUTIVES AND LEADERS...in healthcare, manufacturing, and services. Who know what to measure, and are now ready to learn how to manage those measurements. And... WILLING TO... Challenge and change the way things are done today Motivate workers to think and do them better tomorrow Coach people, versus telling them what to do Be responsible for results, not hold others accountable Encourage people to collaborate, not compete Help people sleep better at night because they're improving their work during the day TO BE CLEAR Measures of Success is not for leaders who'd rather give orders. Then, blame others when things go south. That whole hit the target or else thing... won't create real change, nor real value. But that ain't you, right? AFTER READING MEASURES OF SUCCESS ...you'll be able to answer three critical questions for your business. Are we achieving our target? And, how often? Occasionally? Consistently? Are we improving? And, can we predict our future performance? How do we improve? And, when do we react? When do we ignore? When do we improve? ...AND HOW CAN WE PROVE WE'RE IMPROVING? How would you feel if you could answer these questions for your business? Measures of Success shows you how. PROCESS BEHAVIOR CHARTS This book teaches you a proven method for filtering out noise, so we can identify signals. This means we waste less time chasing our tail and more time responding to signals that really matter, heading off small problems before they become big, or showing that we've boosted performance in significant and sustainable ways.

Microsoft Office 2016: The Complete Guide-Stewart Melart 2015-11-12 PC users need not be bothered in the least as the 2016 versions of Word, PowerPoint, Access, and Excel are here to give you the best experience ever. In addition to all the cool new features that are packed into this software you can have the entire suite cloud-connected, so you can have all your documents at your disposal anytime and place. You will enjoy the comfort ease of locating important information anywhere you are. You will also be able to capitalize on the great opportunity of sharing your documents with your friends, family or colleagues as you get your most important tasks done with easy and great new features.

Shelly Cashman Series Microsoft Office 365 & Excel 2016: Comprehensive-Steven M. Presentation Graphics for Engineering, Science and Business-P.H. Milne 2003-09-02 This book is a guide to the presentation of data in visual format using IBM PCs and compatibles. It includes BASIC programs for graphics presentation of all major types of graph and chart, including 3-D. A special feature is the inclusion of colour plates illustrating the graphics that can be produced.

Supervision Modules to Support Educators in Collaborative Teaching-Kathryn L. Lubniewski 2019-08-01 The classroom teacher in the 21st century is no longer a solo practitioner. What can school leaders use to facilitate on-going, job-embedded, intentionally focused professional development that is unique to the collective needs of teacher pairs and teams as they work together? What can teacher preparation supervisors provide to support teacher candidates and cooperating teachers as they plan, teach, and assess student learning in a co-teaching context? Supervision Modules to Support Educators in Collaborative Teaching is a research-based supervisory handbook designed to promote on-going teacher reflection and development in collaborative teaching contexts. It is a tool for school leaders and teacher preparation supervisors to use for in-service and pre-service teacher development at all grade levels PK-12. The handbook's many resources provide practical guidance for meaningful teacher development that is field-based, relevant to daily teacher work, and artfully presented to build collaboration among teachers as they reflect and learn together. Unique to this approach is that school leaders and supervisors learn alongside teachers and teacher candidates as relevant topics are explored. The handbook contains a collection of eighteen interactive, activity-based modules that focus on topical content knowledge and productive teaching practices. Embedded in the modules are pair and team activities that address problem-solving, dimensions of collaborative teaching, communication and collaboration skill development, understanding of diversity, cultural responsiveness, and shared understanding of evidence-based practices. This resource is easy to use. Once school leaders and supervisors select a module topic to address the needs of a particular pair or team, they are supported with foundational knowledge of the most current research on the topic, discussion questions about the topic, suggestions of productive practices, questions to deepen personal and group understanding, reflective professional growth activities, critical analysis of teaching scenarios, and monitoring, follow-up, and goal setting strategies. Modules can be used in any order and include reproducible materials for pairs and teams to use as they collaborate and grow professionally.

The Really Useful ICT Book-Jill Jesson 2012-10-12 The Really Useful ICT Book is a practical and easy-to-use guide to give you all the confidence you need to use ICT really effectively inside and outside the primary classroom. It makes clear how ICT can be taught as a standalone subject, and how it can be used easily and imaginatively to enhance teaching other subjects. Jam-packed with ideas and templates to save you time, this friendly handbook offers an introduction to: using ICT inside the classroom - including interactive whiteboards, computer suites, VLEs and e-safety using ICT outside the classroom - including word processors, laptops, data loggers and digital cameras when and how to use a wide range of software and hardware - from spreadsheet packages through to digital photography, e-portfolios and software simulation using ICT in all subject areas practical suggestions for using ICT in cross-curricular topics using ICT to develop teacher and pupil creativity using ICT for assessment and in your professional role. With an emphasis on developing children's creativity and on progression from Key Stage 1 to Key Stage 2, The Really Useful ICT Book is a comprehensive compendium of advice and inspiration for all training, newly qualified and experienced teachers, as well as those in support roles in primary schools.

ECSCW 2009: Proceedings of the 11th European Conference on Computer Supported Cooperative Work, 7-11 September 2009, Vienna, Austria-Ina Wagner 2009-08-19 This volume presents the proceedings of ECSCW'09, the 11th European Conference on Computer Supported Cooperative Work. Each conference offers an occasion to critically review our research field, which has been multidisciplinary and committed to high scientific standards, both theoretical and methodological, from its beginning. These proceedings represent discussions and contributions to ongoing challenges. One challenge comes from emerging new technologies connected to 'social computing', gaming, as well as applications supporting citizen participation in their communities. As boundaries between home and work erode with the increased movement of work into home environments, and new applications further blur the once separate conceptions of work and leisure, our intellectual community faces challenges in the ways we think about and study work. Other challenges result from transformations of the world of work itself and the role of IT in these. They have been taken up in in-depth studies of design practice, software development, and manufacturing, as well as in the growing body of research on health care contexts and applications. Finally, there is the question of what is the European perspective in our community and whether it is worthwhile to anchor our research more firmly in such a perspective. Of high relevance to our field is the strong grounding of technology development in an understanding of human activity. The nineteen full papers, four short papers and one discussion paper selected for this conference deal with and reflect on some of these challenges, thus representing the lively debate currently ongoing in our field of research.

The Semantic Web - ISWC 2009-Abraham Bernstein 2009-11-06 As the Web continues to grow, increasing amounts of data are being made available for human and machine consumption. This emerging Semantic Web is rapidly entering the mainstream and, as a result, a variety of new solutions for searching, aggregating and the intelligent delivery of information are being produced, both in research and commercial settings. Several new challenges arise from this context, both from a technical and human-computer interaction perspective - e.g., as issues to do with the scalability and usability of Semantic Web solutions become particularly important. The International Semantic Web Conference (ISWC) is the major international forum where the latest research results and technical innovations on all aspects of the Semantic Web are presented. ISWC brings together researchers, practitioners, and users from the areas of artificial intelligence, databases, social networks, distributed computing, Web engineering, information systems, natural language processing, soft computing, and human-computer interaction to discuss the major challenges and proposed solutions, success stories and failures, as well the visions that can advance the field.

Excel 2010 Bible-John Walkenbach 2010-04-09 A comprehensive reference to the newest version of the world's most popular spreadsheet application: Excel 2010 John Walkenbach's name is synonymous with excellence in computer books that decipher complex technical topics. Known as "Mr. Spreadsheet," Walkenbach shows you how to maximize the power of all the new features of Excel

2010. An authoritative reference, this perennial bestseller proves itself indispensable no matter your level of skill, from Excel beginners and intermediate users to power users and potential power users everywhere. Fully updated for the new release, this latest edition provides comprehensive, soup-to-nuts coverage, delivering over 900 pages of Excel tips, tricks, and techniques you won't find anywhere else. Excel guru and bestselling author John Walkenbach ("Mr. Spreadsheet") guides you through every aspect of Excel. Delivers essential coverage of all the newest features of Excel 2010. Presents material in a clear, concise, logical format that is ideal for all levels of Excel experience. Includes a CD that contains all the templates and worksheets used in the book plus John Walkenbach's award-winning Power Utility Pak. Excel 2010 Bible serves as an excellent resource on all things Excel! Note: CD-ROM/DVD and other supplementary materials are not included as part of eBook file.

Dynamics of decision making: from evidence to preference and belief-Erica Yu 2014-10-24 At the core of the many debates throughout cognitive science concerning how decisions are made are the processes governing the time course of preference formation and decision. From perceptual choices, such as whether the signal on a radar screen indicates an enemy missile or a spot on a CT scan indicates a tumor, to cognitive value-based decisions, such as selecting an agreeable flatmate or deciding the guilt of a defendant, significant and everyday decisions are dynamic over time. Phenomena such as decoy effects, preference reversals and order effects are still puzzling researchers. For example, in a legal context, jurors receive discrete pieces of evidence in sequence, and must integrate these pieces together to reach a singular verdict. From a standard Bayesian viewpoint the order in which people receive the evidence should not influence their final decision, and yet order effects seem a robust empirical phenomena in many decision contexts. Current research on how decisions unfold, especially in a dynamic environment, is advancing our theoretical understanding of decision making. This Research Topic aims to review and further explore the time course of a decision - from how prior beliefs are formed to how those beliefs are used and updated over time, towards the formation of preferences and choices and post-decision processes and effects. Research literatures encompassing varied approaches to the time-scale of decisions will be brought into scope: a) Speeded decisions (and post-decision processes) that require the accumulation of noisy and possibly non-stationary perceptual evidence (e.g., randomly moving dots stimuli), within a few seconds, with or without temporal uncertainty. b) Temporally-extended, value-based decisions that integrate feedback values (e.g., gambling machines) and internally-generated decision criteria (e.g., when one switches attention, selectively, between the various aspects of several choice alternatives). c) Temporally extended, belief-based decisions that build on the integration of evidence, which interacts with the decision maker's belief system, towards the updating of the beliefs and the formation of judgments and preferences (as in the legal context). Research that emphasizes theoretical concerns (including optimality analysis) and mechanisms underlying the decision process, both neural and cognitive, is presented, as well as research that combines experimental and computational levels of analysis.

Excel 2016 For Dummies-Greg Harvey 2016-05-31 Let your Excel skills soar to new heights with this bestselling guide. Updated to reflect the latest changes to the Microsoft Office suite, this new edition of Excel For Dummies quickly and painlessly gets you up to speed on mastering the world's most widely used spreadsheet tool. Written by bestselling author Greg Harvey, it has been completely revised and updated to offer you the freshest and most current information to make using the latest version of Excel easy and stress-free. If the thought of looking at spreadsheet makes your head swell, you've come to the right place. Whether you've used older versions of this popular program or have never gotten a headache from looking at all those grids, this hands-on guide will get you up and running with the latest installment of the software, Microsoft Excel 2016. In no time, you'll begin creating and editing worksheets, formatting cells, entering formulas, creating and editing charts, inserting graphs, designing database forms, and more. Plus, you'll get easy-to-follow guidance on mastering more advanced skills, like adding hyperlinks to worksheets, saving worksheets as web pages, adding worksheet data to an existing web page, and so much more. Save spreadsheets in the Cloud to work on them anywhere. Use Excel 2016 on a desktop, laptop, or tablet. Share spreadsheets via email, online meetings, and social media sites. Analyze data with PivotTables. If you're new to Excel and want to spend more time on your actual work than figuring out how to make it work for you, this new edition of Excel 2016 For Dummies sets you up for success.

Learn Excel 2007 Through Excel 2010 from Mr. Excel-Bill Jelen 2011 Covers how to effectively use Microsoft Excel using examples of real-world business problems.

Better Stock Trading-Daryl Guppy 2011-12-09 An in-depth examination of money management methods for consistent trading success. In Better Stock Trading, Daryl Guppy shows readers how to improve returns by using good money management technique—not by increasing risk in trying to win more trades. Readers will learn how to level the market playing field by using the best money management strategies for their particular account size. From the straightforward two percent rule, to pyramiding methods, and overall portfolio management, Guppy presents a selection of strategies, which will allow any independent trader to capitalize on a rising market and protect funds when the bear takes over. He also shows readers how to study their own trading history and use this information to improve their trading future. Trading skill counts, but money management gives independent traders the edge. Daryl Guppy (Australia) is an experienced and highly successful private trader. A member of IFTA and the Australian Technical Analyst's Association, he is a popular speaker at international trading seminars in Australia and the Asia Pacific region. He is the author of five highly successful trading titles, including Market Trading Tactics (0-471-84663-5), and is the Editorial Director of The Investors' International Bookshelf.

Pro SharePoint 2013 Business Intelligence Solutions-Manpreet Singh 2013-09-13 To get ahead in today's hyper-competitive marketplace, your business has to take advantage of the data you

already have and mine that data to give you new insight, metrics, and clues to what drives successful customer interactions. In Pro SharePoint 2013 Business Intelligence Solutions, you'll learn exactly how to unlock that magic, build business intelligence facilities on SharePoint, and glean insights from data to propel your business to the next level. To understand the various business intelligence offerings in SharePoint 2013, you need to understand the core SQL Server business intelligence concepts, and the first part of the book presents a comprehensive tutorial on those fundamentals. Pro SharePoint 2013 Business Intelligence Solutions then focuses on specific SharePoint business intelligence investments including: Visio Services Excel Services SQL Server Reporting Services Business Connectivity Services Power View and PerformancePoint Services Authors Manpreet Singh, Sha Anandan, Sahil Malik, and Steve Wright walk you through all of this material comprehensively in practical, hands-on format, with plenty of examples to empower you to use these products in your real-life projects. As compelling as SharePoint and SQL Server business intelligence are together, the challenge always has been finding people who understand both SharePoint and SQL Server well enough to deliver such business intelligence solutions. With this book in hand, you become part of that select group. Get your copy of Pro SharePoint 2013 Business Intelligence Solutions today!

Automate the Boring Stuff with Python, 2nd Edition-Al Sweigart 2019-11-12 The second edition of this best-selling Python book (100,000+ copies sold in print alone) uses Python 3 to teach even the technically uninclined how to write programs that do in minutes what would take hours to do by hand. There is no prior programming experience required and the book is loved by liberal arts majors and geeks alike. If you've ever spent hours renaming files or updating hundreds of spreadsheet cells, you know how tedious tasks like these can be. But what if you could have your computer do them for you? In this fully revised second edition of the best-selling classic Automate the Boring Stuff with Python, you'll learn how to use Python to write programs that do in minutes what would take you hours to do by hand--no prior programming experience required. You'll learn the basics of Python and explore Python's rich library of modules for performing specific tasks, like scraping data off websites, reading PDF and Word documents, and automating clicking and typing tasks. The second edition of this international fan favorite includes a brand-new chapter on input validation, as well as tutorials on automating Gmail and Google Sheets, plus tips on automatically updating CSV files. You'll learn how to create programs that effortlessly perform useful feats of automation to:

- Search for text in a file or across multiple files
- Create, update, move, and rename files and folders
- Search the Web and download online content
- Update and format data in Excel spreadsheets of any size
- Split, merge, watermark, and encrypt PDFs
- Send email responses and text notifications
- Fill out online forms

Step-by-step instructions walk you through each program, and updated practice projects at the end of each chapter challenge you to improve those programs and use your newfound skills to automate similar tasks. Don't spend your time doing work a well-trained monkey could do. Even if you've never written a line of code, you can make your computer do the grunt work. Learn how in Automate the Boring Stuff with Python, 2nd Edition.

A Visual Guide to Stata Graphics, Second Edition-Michael N. Mitchell 2008-06-04 Whether you are new to Stata graphics or a seasoned veteran, A Visual Guide to Stata Graphics, Second Edition will teach you how to use Stata to make publication-quality graphs that will stand out and enhance your statistical results. With over 900 illustrated examples and quick-reference tabs, this book quickly guides you to the information you need for creating and customizing high-quality graphs for any types of statistical data.

Learn Office 2016 for Mac-Guy Hart-Davis 2016-07-26 A practical, hands-on approach to using Office 2016 applications to create and edit documents and get work done efficiently. You'll learn how to customize Office, design, create, and share documents, manipulate data in a spreadsheet, and create lively presentations. You'll also discover how to organize your email, contacts, and tasks with the new Outlook for Mac. Conveying information quickly and concisely, the book brings you from beginner or intermediate to an experienced and confident user. Office for Mac remains the leading productivity suite for Mac, with Apple's iWork and the free OpenOffice.org trailing far behind. Now, it's been updated with a cleaner interface and more compatibility with Exchange and SharePoint. This book provides the best combination of accessible and focused coverage of the Office 2016 applications. Rather than cover every seldom-used feature, the book covers real-world usage, putting emphasis on practical tasks and troubleshooting common problems, such as sharing documents with Windows users and older versions of Office. What You Will Learn Create professional documents for home and business using Word Edit documents collaboratively in real time with your colleagues Record and manipulate data using spreadsheets Use your data to create powerful and convincing charts Build persuasive multimedia presentations in PowerPoint Deliver presentations like an expert Keep your e-mail under control with Outlook Stay on top of your schedule and your tasks Who This Book Is For Any Mac user who needs to work with Word, Excel, PowerPoint, or Outlook either for business or for pleasure. Professionals, students, and home user alike will benefit from straightforward explanations, step-by-step instructions, and effective workarounds for everyday problems.

Beginning Excel, First Edition-Barbara Lave 2020 This is the first edition of a textbook written for a community college introductory course in spreadsheets utilizing Microsoft Excel; second edition available: <https://openoregon.pressbooks.pub/beginningexcel19/>. While the figures shown utilize Excel 2016, the textbook was written to be applicable to other versions of Excel as well. The book introduces new users to the basics of spreadsheets and is appropriate for students in any major who have not used Excel before.

Practical Business Statistics-Andrew Siegel 2016-07-29 Practical Business Statistics, Seventh Edition, provides a conceptual, realistic, and matter-of-fact approach to managerial statistics that carefully maintains, but does not overemphasize mathematical correctness. The book provides deep understanding of how to learn from data and how to deal with uncertainty while promoting the use of practical computer applications. This valuable, accessible approach teaches present and future managers how to use and understand statistics without an overdose of technical detail, enabling them to better understand the concepts at hand and to interpret results. The text uses excellent examples with real world data relating to business sector functional areas such as finance, accounting, and marketing. Written in an engaging style, this timely revision is class-tested and designed to help students gain a solid understanding of fundamental statistical principles without bogging them down with excess mathematical details. Provides users with a conceptual, realistic, and matter-of-fact approach to managerial statistics Offers an accessible approach to teach present and future managers how to use and understand statistics without an overdose of technical detail, enabling them to better understand concepts and to interpret results Features updated examples and graphics (200+ figures) to illustrate important applied uses and current business trends Includes robust ancillary instructional materials such as an instructor's manual, lecture slides, and data files to save you time when preparing for class

Fixing PowerPoint Annoyances-Echo Swinford 2006-02-17 If you're vexed and perplexed by PowerPoint, pick up a copy of Fixing PowerPoint Annoyances. This funny, and often opinionated, guide is chock full of tools and techniques for eliminating all the problems that drive audiences and presenters crazy. There's nothing more discouraging than an unresponsive audience--or worse, one that snickers at your slides. And there's nothing more maddening than technical glitches that turn your carefully planned slide show into a car wreck. Envious when you see other presenters effectively use nifty features that you've never been able to get to work right? Suffer no more! Fixing PowerPoint Annoyances by Microsoft PowerPoint MVP Echo Swinford rides to the rescue. Microsoft PowerPoint is the most popular presentation software on the planet, with an estimated 30 million presentations given each day. So no matter how frustrated you get, you're not about to chuck the program in the Recycle Bin. Fixing PowerPoint Annoyances, presents smart solutions to a variety of all-too-familiar, real-world annoyances. The book is divided into big categories, with annoyances grouped by topic. You can read it cover to cover or simply jump to the chapter or section most relevant to you. Inside its pages you'll learn how to create your own templates, work with multiple masters and slide layouts, and take advantage of various alignment and formatting tools. You'll also learn how to import Excel data; insert graphics, PDF, and Word content; create, edit, and format organization charts and diagrams; use action settings and hyperlinks to jump to other slides; and add sound, video, and other types of multimedia to spark up your presentations. Entertaining and informative, Fixing PowerPoint Annoyances is filled with humorous illustrations and packed with sidebars, tips, and tricks, as well as links to cool resources on the Web.
