Fundamentals of Computer Programming with C#-Svetlin Nakov 2013-09-01 The free book "Fundamentals of Computer Programming with C#" is a comprehensive computer programming tutorial that teaches programming, logical thinking, data structures and algorithms, problem solving and high quality code with lots of examples in C#. It starts with the first steps in programming and software development like variables, data types, conditional statements, loops and arrays and continues with other basic topics like methods, numeral systems, strings and string processing, exceptions, classes and objects. After the basics this fundamental programming book enters into more advanced programming topics like recursion, data structures (lists, trees, hash-tables and graphs), high-quality code, unit testing and refactoring, object-oriented principles (inheritance, abstraction, encapsulation and polymorphism) and their implementation the C# language. It also covers fundamental topics that each good developer should know like algorithm design, complexity of algorithms and problem solving. The book uses C# language and Visual Studio to illustrate the programming concepts and explains some C# / .NET specific technologies like lambda expressions, extension methods and LINQ. The book is written by a team of developers lead by Svetlin Nakov who has 20+ years practical software development experience. It teaches the major programming concepts and way of thinking needed to become a good software engineer and the C# language in the meantime. It is a great start for anyone who wants to become a skillful software engineer. The books does not teach technologies like databases, mobile and web development, but shows the true way to master the basics of programming regardless of the languages, technologies and tools. It is good for beginners and intermediate developers who want to put a solid base for a successful career in the software engineering industry. The book is accompanied by free video lessons, presentation slides and mind maps, as well as hundreds of exercises and live examples. Download the free C# programming book, videos, presentations and other resources from <http://introprogramming.info>. Title: Fundamentals of Computer Programming with C# (The Bulgarian C# Programming Book) ISBN: 9789544007737 ISBN-13: 978-954-400-773-7 (9789544007737) ISBN-10: 954-400-773-3 (9544007733) Author: Svetlin Nakov & Co. STAR- 1980-07

Class, Race, and Inequality in South Africa-Jeremy Seekings 2008-10-01 The distribution of incomes in South Africa in 2004, ten years after the transition to democracy, was probably more unequal than it had been under apartheid. In this book, Jeremy Seekings and Nicoli Nattrass explain why this is so, offering a detailed and comprehensive analysis of inequality in South Africa from the midtwentieth century to the early twenty-first century. They show that the basis of inequality shifted in the last decades of the twentieth century from race to class. Formal deracialization of public policy did not reduce the actual disadvantages experienced by the poor nor the advantages of the rich. The fundamental continuity in patterns of advantage and disadvantage resulted from underlying continuities in public policy, or what Seekings and Nattrass call the "distributional regime." The post-apartheid distributional regime continues to divide South Africans into insiders and outsiders. The insiders, now increasingly multiracial, enjoy good access to well-paid, skilled jobs; the outsiders lack skills and employment.

Sometimes There Is a Void-Zakes Mda 2012-01-03 Zakes Mda is the most acclaimed South African writer of the independence era. His eight novels tell stories that venture far beyond the conventional narratives of a people's struggle against apartheid. In this memoir, he tells the story of a life that intersects with the political life of his country but that at its heart is the classic adventure story of an artist, lover, father, teacher, and bon vivant. Zakes Mda was born in 1948 into a family of lawyers and grew up in Soweto's ambitious educated black class. At age fifteen he crossed the Telle River from South Africa into Basutoland (Lesotho), exiled like his father, a "founding spirit" of the Pan Africanist Congress. Exile was hard, but it was just another chapter in Mda's coming-of-age. He served as an altar boy (and was preyed on by priests), flirted with shebeen girls, feared the racist Boers, read comic books alongside the literature of the PAC, fell for the music of Dvorák and Coltrane, wrote his first stories—and felt the void at the heart of things that makes him an outsider wherever he goes. The Soweto uprisings called him to politics; playwriting brought him back to South Africa, where he became writer in residence at the famed Market Theatre; three marriages led him hither and yon; acclaim brought him to America, where he began writing the novels that are so thick with the life of his country. In all this, Mda struggled to remain his own man, and with *Sometimes There Is a Void* he shows that independence opened the way for the stories of individual South Africans in all their variety.

Long Walk to Freedom-Nelson Mandela 2008-03-11 The book that inspired the major new motion picture *Mandela: Long Walk to*

Freedom. Nelson Mandela is one of the great moral and political leaders of our time: an international hero whose lifelong dedication to the fight against racial oppression in South Africa won him the Nobel Peace Prize and the presidency of his country. Since his triumphant release in 1990 from more than a quarter-century of imprisonment, Mandela has been at the center of the most compelling and inspiring political drama in the world. As president of the African National Congress and head of South Africa's antiapartheid movement, he was instrumental in moving the nation toward multiracial government and majority rule. He is revered everywhere as a vital force in the fight for human rights and racial equality. **LONG WALK TO FREEDOM** is his moving and exhilarating autobiography, destined to take its place among the finest memoirs of history's greatest figures. Here for the first time, Nelson Rolihlahla Mandela tells the extraordinary story of his life--an epic of struggle, setback, renewed hope, and ultimate triumph.

Introstat-Les Underhill 1996-12-31 An introduction to applied statistics, this text assumes a basic understanding of differentiation and integration.

Government Reports Announcements & Index- 1987

Applied Business Statistics 5e-Trevor Wegner 2020 Applied Business Statistics 5e is an introductory and intermediate Statistics text for students of Management. Its business applications-oriented approach aims to teach Management students how statistics (or data analytics) can be used as a valuable decision-support tool in any discipline of management practice.

Construction in Southern Africa- 1975

Extra-grammatical Morphology in English-Elisa Mattiello 2013-01-30 Extra-grammatical morphology is a hitherto neglected area of research, highly marginalised because of its irregularity and unpredictability. Yet many neologisms in English are formed by means of extra-grammatical mechanisms, such as abbreviation, blending and reduplication, which therefore deserve both greater attention and more systematic study. This book analyses such phenomena.

Raw Life, New Hope-Fiona C. Ross 2010 The Cape Flats, that windswept, treeless, barren, sandy area between two oceans at Africa's southern tip, is home to more than a million people, approximately one quarter of Cape Town's population. Many live in the sprawling shack settlements that ring the city. The post-apartheid state is attempting to eradicate such settlements by providing formal houses in planned residential estates. This book describes, over 17 years, the lives of the residents of one such shack settlement, The Park, who moved to new, 'formal' houses in The Village at the turn of the millennium.

Applied Machine Learning-David Forsyth 2019-07-12 Machine learning methods are now an important tool for scientists, researchers, engineers and students in a wide range of areas. This book is written for people who want to adopt and use the main tools of machine learning, but aren't necessarily going to want to be machine learning researchers. Intended for students in final year undergraduate or first year graduate computer science programs in machine learning, this textbook is a machine learning toolkit. Applied Machine Learning covers many topics for people who want to use machine learning processes to get things done, with a strong emphasis on using existing tools and packages, rather than writing one's own code. A companion to the author's Probability and Statistics for Computer Science, this book picks up where the earlier book left off (but also supplies a summary of probability that the reader can use). Emphasizing the usefulness of standard machinery from applied statistics, this textbook gives an overview of the major applied areas in learning, including coverage of:• classification using standard machinery (naive bayes; nearest neighbor; SVM)• clustering and vector quantization (largely as in PSCS)• PCA (largely as in PSCS)• variants of PCA (NIPALS; latent semantic analysis; canonical correlation analysis)• linear regression (largely as in PSCS)• generalized linear models including logistic regression• model selection with Lasso, elasticnet• robustness and m-estimators• Markov chains and HMM's (largely as in PSCS)• EM in fairly gory detail; long experience teaching this suggests one detailed example is required, which students hate; but once they've been through that, the next one is easy• simple graphical models (in the variational inference section)• classification with neural networks, with a particular emphasis on image classification• autoencoding with neural networks• structure learning

Images-George Hallett 1979

The Autobiography of an Unknown South African-Noboth Mokgatle 2021-05-28 This title is part of UC Press's Voices Revived program, which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. Drawing on a backlist dating to 1893, Voices Revived makes high-quality, peer-reviewed scholarship accessible once again using print-on-demand technology. This title was originally published in 1971.

Harper's Weekly- 1900

Biometric State-Keith Breckenridge 2014-10-02 Biometric identification and registration systems are being proposed by governments and businesses across the world. Surprisingly they are under most rapid, and systematic, development in countries in Africa and Asia. In this groundbreaking book, Keith Breckenridge traces how the origins of the systems being developed in places like India, Mexico, Nigeria and Ghana can be found in a century-long history of biometric government in South Africa, with the South African experience of centralized fingerprint identification unparalleled in its chronological depth and demographic scope. He shows how empire, and particularly the triangular relationship between India, the Witwatersrand and Britain, established the special South African obsession with biometric government, and shaped the international politics that developed around it for the length of the twentieth century. He also examines the political effects of biometric registration systems, revealing their consequences for the basic workings of the institutions of democracy and authoritarianism.

South Africa-Nancy L Clark 2016-06-17 *South Africa: The Rise and Fall of Apartheid* examines the history of South Africa from 1948 to the present day, covering the introduction of the oppressive policy of apartheid when the Nationalists came to power, its mounting opposition in the 1970s and 1980s, its eventual collapse in the 1990s, and its legacy up to the present day. Fully revised, the third edition includes: new material on the impact of apartheid, including the social and cultural effects of the urbanization that occurred when Africans were forced out of rural areas analysis of recent political and economic issues that are rooted in the apartheid regime, particularly continuing unemployment and the emergence of opposition political parties such as the Economic Freedom Fighters an updated Further Reading section, reflecting the greatly increased availability of online materials an expanded set of primary source documents, providing insight into the minds of those who enforced apartheid and those who fought it. Illustrated with photographs, maps and figures and including a chronology of events, glossary and Who's Who of key figures, this essential text provides students with a current, clear, and succinct introduction to the ideology and practice of apartheid in South Africa.

Beyond C. L. R. James-John Nauright 2014-11 A collection of essays that analyze the interconnections between race, ethnicity, and sport.

A Survey of Race Relations in South Africa- 1993

Advances in Safety, Reliability and Risk Management-Christophe Berenguer 2011-08-31 *Advances in Safety, Reliability and Risk Management* contains the papers presented at the 20th European Safety and Reliability (ESREL 2011) annual conference in Troyes, France, in September 2011. The book covers a wide range of topics, including: Accident and Incident Investigation; Bayesian methods; Crisis and Emergency Management; Decision Making

The Letters of J.R.R. Tolkien-J.R.R. Tolkien 2014-02-21 This collection will entertain all who appreciate the art of masterful letter writing. The Letters of J.R.R. Tolkien sheds much light on Tolkien's creative genius and grand design for the creation of a whole new world: Middle-earth. Featuring a radically expanded index, this volume provides a valuable research tool for all fans wishing to trace the evolution of *THE HOBBIT* and *THE LORD OF THE RINGS*.

Embargo-Richard Hengeveld 1995 *Embargo* is the first book to provide a comprehensive overview of oil sanctions. A group of authors, all of whom were intimately involved with the campaigning for and monitoring of the international oil embargo, reveals the story of South Africa's oil under apartheid from the first call for oil sanctions in 1960 to the final lifting in 1993. The book is aimed at readers interested in economic sanctions, the history of apartheid in South Africa, the international oil trade, and action-orientated research.

My Fight Against Apartheid-Michael Dingake 1987

Women on the Move-Belinda Dodson 1998

Touched by Africa-Edwin S. Munger 1983

ICT Analysis and Applications-Simon Fong 2020 This book proposes new technologies and discusses future solutions for ICT design infrastructures, as reflected in high-quality papers presented at the 5th International Conference on ICT for Sustainable Development (ICT4SD 2020), held in Goa, India, on 23-24 July 2020. The conference provided a valuable forum for cutting-edge research discussions among pioneering researchers, scientists, industrial engineers, and students from all around the world. Bringing together experts from different countries, the book explores a range of central issues from an international perspective.

Rowland Ward's African Records of Big Game-Rowland Ward 1984

Developing Basic Space Science World-Wide-Willem Wamsteker 2007-05-08 ? J. Andersen Niels Bohr Institute for Astronomy Physics and Geophysics Astronomical Observatory Copenhagen ja@astro.ku.dk The development of astronomy worldwide begins at the roots: Already from childhood, humans of all nations and civilizations seem to share an innate fascination with the sky. Yet, people in different regions of the world have vastly different possibilities for pursuing this interest. In wealthy, industrialised societies the way is open to a school or higher education in science, possibly leading to a career in astronomy or basic or applied space science for the benefit of the country as well as the individual. In other regions, neither the financial nor the trained human resources are sufficient to offer that avenue to the future of the young generation, or those intellectual resources to the development of their country. This book addresses ways and means by which these obstacles can be, if not fully overcome, then at least significantly reduced.

Black Politics in South Africa Since 1945-Tom Lodge 1983

Digital Information Processing and Communications-Václav Snásel 2011-06-30 This two-volume-set (CCIS 188 and CCIS 189) constitutes the refereed proceedings of the International Conference on Digital Information Processing and Communications, ICDIPC 2011, held in Ostrava, Czech Republic, in July 2011. The 91 revised full papers of both volumes presented together with 4 invited talks were carefully reviewed and selected from 235 submissions. The papers are organized in topical sections on network security; Web applications; data mining; neural networks; distributed and parallel processing; biometrics technologies; e-learning; information ethics; image processing; information and data management; software engineering; data compression; networks; computer security; hardware and systems; multimedia; ad hoc network; artificial intelligence; signal processing; cloud computing; forensics; security; software and systems; mobile networking; and some miscellaneous topics in digital information and communications.

Come on Down?-Dominic Strinati 2004-02-24 Come on Down represents an introduction to popular media culture in Britain since 1945. It discusses the ways in which popular culture can be studied, understood and appreciated, and covers its key analytical issues and some of its most important forms and processes. The contributors analyse some of popular culture's leading and most representative expressions such as TV soaps, quizzes and game shows, TV for children, media treatment of the monarchy, Pop Music, Comedy, Advertising, Consumerism and Americanization. The diversity of both subject matter and argument is the most distinctive feature of the collection, making it a much-needed and extremely accessible, interdisciplinary introduction to the study of popular media culture. The contributors, many of them leading figures in their respective areas of study, represent a number of different approaches which themselves reflect the diversity and promise of contemporary theoretical debates. Their studies encompass issues such as the economics of popular culture, its textual complexity and its interpretations by audiences, as well as concepts such as ideology, material culture and postmodernism.

How Long Will South Africa Survive?-R.W. Johnson 2015-01-11 In 1977, Johnson's best selling How Long Will South Africa Survive? offered a controversial and highly original analysis of the survival prospects of apartheid. Now, after more than two decades of the ANC in government, he believes the question must be posed again. "The big question about ANC rule," Johnson writes, "is whether African nationalism would be able to cope with the challenges of running a modern industrial economy. Twenty years of ANC rule have shown conclusively that the party is hopelessly ill equipped for this task. Indeed, everything suggests that South Africa under the ANC is fast slipping backward and that even the survival of South Africa as a unitary state cannot be taken for granted. The fundamental reason why the question of regime change has to be posed is that it is now clear that South Africa can either choose to have an ANC government or it can have a modern industrial economy. It cannot have both."

Disability and Social Change-Brian Watermeyer 2006 This powerful volume represents the broadest engagement with disability issues in South Africa yet. Themes include theoretical approaches to, and representations of, disability; governmental and civil society responses to disability issues; aspects of education as these pertain to the oppression/liberation of disabled people; social security for disabled people; the complex politics permeating service provision relationships; and a consideration of disability in relation to human spaces - physical, economic and philosophical. Firmly located within the social model of disability, this collection resonates powerfully with contemporary thinking and research in the disability field and sets a new benchmark for cutting-edge debates in a transforming South Africa.

Letters from Robben Island-Robert D. Vassen 1999-08-31 Late one night in July, 1963, a South African police unit surrounded the

African National Congress headquarters in Rivonia and arrested a group of Movement leaders gathered inside. Eventually eight of them, including Nelson Mandela, who was already serving a sentence, Walter Sisulu, Dennis Goldberg, Govan Mbeki, Raymond Mhlaba, Elias Motsledi, Andrew Mangeni, and Ahmed Kathrada, were convicted of sabotage and, on June 12, 1964, sentenced to life in prison. Soon, these men became widely known as the "Rivonia Trialists." Despite their imprisonment, the Trialists played active roles in the struggle against South Africa's racist regime. Instead of being forgotten, as apartheid officials had hoped, they became enduring symbols in a struggle against injustice and racism. Kathrada and his colleagues were classified as high security prisoners, segregated from others and closely watched. Every activity was regulated and monitored. Among the many indignities visited upon them, the prisoners were prohibited from keeping copies of incoming and outgoing correspondence. Kathrada, or "Kathy" as he is known, successfully hid both. *Letters From Robben Island* contains a selection of 86 of the more than 900 pieces of correspondence Ahmed Kathrada wrote during his 26 years on Robben Island and at Pollsmoor Prison. Some were smuggled out by friends; others were written in code to hide meaning and content from prison censors. These are among his most poignant, touching, and eloquent communications. They are testimonies to Kathrada, his colleagues, and to their commitment to obtaining human dignity and freedom for all South Africans.
