The Complete Sermons of C. H. Spurgeon, Book 1 (Vol. 1-3)-C. H. Spurgeon 2015-04-02 The story of Charles Haddon Spurgeon's life is nothing less than titanic. Within 2 years and 6 months of accepting the pastorate of the New Park Street Chapel as a boy of 19, the Sunday service grew from 242 to over 7,000 in attendance. What can account for the meteoric rise in popularity? Why did so many wish to

hear his sermons? It is the same reason why one ought to study the sermons of Spurgeon to this day: in a famished land of moralism, he preached the bread of Jesus Christ. Containing the first three volumes of the sixty-three volumes published from the Metropolitan Tabernacle pulpit, this book holds 164 sermons, 'as plump as a partridge, and as full of meat as an egg.' David A. Attebury is currently pursuing a Masters of Divinity from The Southern Baptist Theological Seminary in Louisville, Kentucky.

Clinical Pharmacy and Therapeutics E-Book-Cate Whittlesea 2018-09-11 'This new edition of Clinical Pharmacy and Therapeutics was really very helpful when I was doing an MSc course in Advancing Pharmacy Practice and it was really very helpful in all the clinical diseases I have to read for my PBL. I also used it as one of my most reliable reference books for the in-course simulation ward rounds and other clinical case studies. It is a great book to have as a practising clinical or hospital pharmacist or even community pharmacist. It will also be of great use to anyone doing a course in pharmacotherapy. This book will always be of use to you throughout your studentship or when practising after graduation. It is also more portable than most other pharmacotherapy textbooks with the same amount of information.' Now in its sixth edition, this best-selling, multi-disciplinary textbook continues to draw on the skills of pharmacists, clinicians and nurses to present optimal drug regimens. The authors integrate an understanding of the disease processes with an appreciation of the pathophysiological processes, clinical pharmacy and

the evidence base. Each chapter is co-written by a pharmacist and a clinician, and each chapter begins with key points and ends with cases to test understanding. The sixth edition is now on StudentConsult for the first time, giving online access to the full text. Key points boxes at the beginning of each chapter Case-study boxes throughout the chapters Each chapter co-written by a pharmacist and a clinician In-depth treatment of therapeutics to support pharmaceutical prescribing Logical order and format: key points, epidemiology, aetiology, disease, clinical manifestations, investigations and treatment, drugs used in treatment. Dosage reference sources given where appropriate, along with useful websites and further reading for each chapter. New co-editor, Karen Hodson Over 10 new authors Now in 4-colour On StudentConsult for the first time New chapter on Dementia Many new and revised illustrations Chapters revised to include advances in therapeutics and changes to dose regimens and licensed indications Updated case studies

So Great a Salvation-Jon C. Laansma 2019-06-27 This volume presents a dialogue between historians, exegetes, and theologians on the background and key themes of the atonement in Hebrews. Presenting a range of differing perspectives and contributing to the renewed conversation between biblical and theological scholarship, the argument is structured in two parts: contexts and themes within Hebrews. Focusing on atonement not only in the Old Testament but also in the Greco-Roman world, and touching on themes such as sacrifice, plight and solution, and faith,

these contributions shed light on the concept of the atonement in a directly scriptural way. The whole is a definitive collection of studies on the atonement in Hebrews that will be of service well beyond the confines of Hebrews' specialists, a collection as important for what it says about the atonement and the 21st century church as for what it says about Hebrews.

Transfusion Medicine, Apheresis, and Hemostasis-Huy P. Pham 2017-09-15 Transfusion Medicine, Apheresis, and Hemostasis: Review Questions and Case Studies is the collaborative effort that spanned a time period of 2 years and included 50 experts, many whom are national leaders in their respected fields. It also represents the passion and privilege we feel to teach the next generation of physicians

in Transfusion Medicine and Apheresis. The main goal for this book is to help the readers build a solid foundation of both basic and advanced conceptual knowledge to prepare for the American Board of Pathology (ABP) certification exam in Transfusion Medicine. This book is not intended to be a substitute for textbooks, original research or review articles, and/or clinical training. Further, since the field of medicine, both from a scientific and regulatory perspective, rapidly changes, the readers are advised to continuously update their knowledge by attending national meetings and reading clinical journals. To equip the readers with the basic knowledge in critical reading and data analysis, which is an essential skill in daily medical practice, a novel chapter titled “Data Interpretation in Laboratory Medicine” was included in this book. In this chapter, the readers are asked to make logical conclusions based on the given data and/or statistical results. Moreover, there is also a chapter on “Practical Calculations in Transfusion Medicine, Apheresis, and Hemostasis” to help consolidate all the necessary formulas commonly used in daily practice for easy reference. These chapters are unique to our book and will not be found in any other currently on the market. All of the questions in this book were originally created by the authors of each chapter. Each question can either be standalone or part of a case scenario representing challenge cases in Transfusion Medicine, Apheresis, and Hemostasis. These questions often represent both rare and common clinical scenarios that the authors have seen during their clinical practice. Each question is then followed by 5 possible answers, with only one being correct (or the best answer). After the question, there is a conceptual explanation

followed by a more factual explanation of the right and wrong answers. We gave the individual authors the freedom to choose how they explained the wrong answer choices. Some authors chose to be more direct (e.g. Answer A is incorrect because...), while other authors chose a more conversational style (e.g. Human resources (answer A) includes staffing, selection, orientation, training, and competency assessment of employees). This format is designed to help the student linking the conceptual and factual knowledge together to form a solid foundation for use in clinical practice. At the end of each chapter, there is a list of articles and textbooks that will prove useful to the motivated student who wishes to become an expert in the field. Another special feature to our textbook is the presence of a pre-test and post-test, which are provided to help the readers with self-assessment. As stated above, the main focus of this book is to help the readers preparing for the ABP certification exam in Transfusion Medicine. However, due to the interdisciplinary nature of the field of Transfusion Medicine, Apheresis, and Hemostasis, we believe that this book is also beneficial to and can be used by all clinicians involved in the management of complex transfusion, apheresis, and hemostasis issues, such as hematologists, anesthesiologists, surgeons, and critical care physicians. We further believe that it is a helpful guide for these specialists to prepare for their own specialty certification exam, when the topics are related to Transfusion Medicine, Apheresis, and Hemostasis.
