Structure and Function of Plasma Proteins-A. Allison 2012-12-06 Plasma proteins are of interest from many points of view. Biochemists have separated and purified numerous plasma proteins and studied their physical properties, amino acid composition and sequence, the carbohydrate components of some, and binding of metals, hormones and other materials. Much work has also been carried out on the synthesis, rates of turnover and degradation of plasma proteins. Many plasma proteins show inherited variations, some of which (e.g. those of heptoglobins and transferrins) are common in various human populations while others (e.g. absence of lipoproteins or immunoglobins) are rare but important because of their association with clinical syndromes. Since blood is the most accessible bodily constituent, geneticists have made good use of serum protein differences as genetic markers in family and population studies. Physiologists have long been interested in plasma proteins in relation to colloid osmotic pressure, transport of lipids, iron, hormones and other materials, the activities of renal glomeruli and tubules, the function of the liver, and many other bodily activities. Plasma proteins

are also widely studied in relation to malnutrition and undernutrition, particularly that associated with defective intake of protein.

Regulation of red cell life-span, erythropoiesis, senescence and clearance-Lars Kaestner 2014-12-03 Human red blood cells are formed mainly in the bone marrow and are believed to have an average life span of approximately 120 days. However, is it true for all red blood cells? What are the changes associated with red cell maturation, adulthood and senescence? What are the determinants of red cell life span and clearance? What are the mechanisms in control of red cell mass in healthy humans and patients with various forms of anemia? What are the markers of circulating red cell senescence and in cells during storage and transfusion? Within the life span may properties of red cells change leading to age-mixed circulating cell populations. Although these cells appear to be genetically terminated by the time they are released into the blood stream, they undergo surprisingly versatile modifications depending on the life-style and health conditions of a "human host". Numerous disorders are believed to be associated with facilitated ageing of red blood cells. "In vitro ageing" and damage of red blood cells during storage is yet one more important issue related to the risks and efficiency of blood

transfusion. Many of the mechanisms behind such effects are far from being fully understood. In this context the Research Topic is set to include articles in the field of biochemical investigations, biophysical approaches, physiological and clinical studies related to red blood cell maturation and aging. This includes Original Research, Methods, Hypothesis and Theory, Reviews and Perspectives.

Blood Narrative-Chadwick Allen 2002-07-16 Blood Narrative is a comparative literary and cultural study of post-World War II literary and activist texts by New Zealand Maori and American Indians—groups who share much in their responses to European settler colonialism. Chadwick Allen reveals the complex narrative tactics employed by writers and activists in these societies that enabled them to realize unprecedented practical power in making both their voices and their own sense of indigeneity heard. Allen shows how both Maori and Native Americans resisted the assimilationist tide rising out of World War II and how, in the 1960s and 1970s, they each experienced a renaissance of political and cultural activism and literary production that culminated in the formation of the first general assembly of the World Council of Indigenous Peoples. He focuses his comparison on two fronts: first, the blood/land/memory complex that refers to these groups' struggles to define indigeneity and to be freed from the definitions of authenticity imposed by dominant settler cultures. Allen's second focus is on the discourse of treaties between American Indians and the U.S. government and between Maori and Great Britain, which he contends offers strong legal and moral bases from which these indigenous minorities can argue land and resource rights as well as cultural and identity politics. With its implicit critique of multiculturalism and of postcolonial studies that have tended to neglect the colonized status of indigenous First World minorities, Blood Narrative will appeal to students and scholars of literature, American and European history, multiculturalism, postcolonialism, and comparative cultural studies.

New Blood-Chris Bobel 2010-05-05 *New Blood* offers a fresh interdisciplinary look at feminism-in-flux. For over three decades, menstrual activists have questioned the safety and necessity of feminine care products while contesting menstruation as a deeply entrenched taboo. Chris Bobel shows how a little-known yet enduring force in the feminist health, environmental, and consumer rights movements lays bare tensions between second- and third-wave feminisms and reveals a complicated story of continuity and change within the women's movement. Through her critical ethnographic lens, Bobel focuses on debates central to feminist thought (including the utility of the category "gender") and challenges to building an inclusive feminist movement. Filled with personal narratives, playful visuals, and original humor, *New Blood* reveals middle-aged progressives communing in Red Tents, urban punks and artists "culture jamming" commercial menstrual products in their zines and sketch comedy, queer anarchists practicing DIY health care, African American health educators espousing "holistic womb health," and hopeful mothers refusing to pass on the shame to their pubescent daughters. With verve and conviction, Bobel illuminates today's feminism-on-the-ground--indisputably vibrant, contentious, and ever-dynamic.

Bad Blood-John Carreyrou 2018-05-21 NEW YORK TIMES BEST SELLER • NAMED ONE OF THE BEST BOOKS OF THE YEAR BY: NPR, The New York Times Book Review, Time, Wall Street Journal, Washington Post • The McKinsey Business Book of the Year The full inside story of the breathtaking rise and shocking collapse of Theranos, the one-time multibillion-dollar biotech startup founded by Elizabeth Holmes—now the subject of the HBO documentary *The Inventor*—by the prize-winning journalist who first broke the story and pursued it to the end. “The story is even crazier than I expected, and I found myself unable to put it down once I started. This book has everything: elaborate scams, corporate intrigue, magazine cover stories, ruined family relationships, and the demise of a company once valued at nearly \$10 billion.” —Bill Gates In 2014, Theranos founder and CEO Elizabeth Holmes was widely seen as the female Steve Jobs: a brilliant Stanford dropout whose startup “unicorn” promised to revolutionize the medical industry with a machine that would make blood testing significantly faster and easier. Backed by investors such as Larry Ellison and Tim Draper, Theranos sold shares in a fundraising round that valued the company at more than \$9 billion, putting Holmes’s worth at an estimated \$4.7 billion. There was just one problem: The technology didn’t work. A riveting story of the biggest corporate fraud since Enron, a tale of ambition and hubris set amid the bold promises of Silicon Valley.

Sir Gawain and the Green Knight-Anonymous 2012-10-19 Sir Gawain and the Green Knight is a masterpiece of medieval English literature and one of the finest Arthurian tales in any language. Though its ingenious plotting and verbal artistry continue to dazzle readers, it is written in a challenging regional dialect and uses many words that were already archaic when the poem was written in the late fourteenth century. This edition is designed to make the poem, in its original Middle English, accessible to students and general readers. Following standards adopted for editing other Middle English poets, the edition lightly normalizes spellings to make words more recognizable for a modern audience. Extensive marginal glossing of difficult words, thorough on-page explanatory notes, and a comprehensive glossary offer further support for readers. The historical appendices include other examples of medieval romance from France and Britain.
