VW Beetle Specification Guide 1949-1967-Richard Copping 2018-10-31 The VW Beetle is one of the best-loved of all classic cars, with many thousands preserved across the world, many in regular use. Over the years countless changes were introduced, together making a mid sixties Beetle, for instance, very different from one built in the mid-50s, or mid-70s, despite the obvious similarities. With the aid of hundreds of full colour photographs this new edition in paperback documents all the Beetle's specification changes and model differences during the classic period 1949-67, making it possible to determine the original specification and fittings of any Beetle from this period. Uses the same format as for the highly successful VW Transporter spec guides. Aimed at early-Beetle owners and enthusiasts. Superbly illustrated with 300 colour photographs. New edition in paperback for 2018.

Berlin Battlefield Guide-Tony Le Tissier 2014-05-07 A comprehensive look at World War II battle sites in the German capital. On April 16, 1945, the Red Army unleashed a colossal offensive against Berlin with the aim of destroying Hitler's armies in the East and capturing the German capital before the Western Allies. Over two million soldiers confronted each other in the last act in the war against Nazi Germany. In the course of the next three weeks, relentless Soviet assaults crashed against a desperate, sometimes suicidal defense, and the historic city was turned into a vast battleground. This was the climax of an awful conflict. It represented the death struggle of Hitler's Third Reich and the supreme achievement of Stalin's forces, and the story of the battle has fascinated students of warfare ever since. Yet this epic contest can only be understood by visiting the sites of the battle on the ground, on the outskirts of the city, in the suburbs, in the city center where the final dramatic combat took place. And this is the aim of Tony Le Tissier's definitive guide to the Battle of Berlin.

The Broadcaster's Guide to RBDS-Scott Wright 1997-07-29 This handbook is intended to give the broadcast industry an authoritative guide to the Radio Data System (RDS), also called Radio Broadcast Data System (RBDS). Since the standard's adoption, about 700 stations have begun broadcasting RDS in the United States. There is a wide variety of encoding equipment with prices starting as low as

\$400, and over 30 models of RDS receivers have been introduced for cars, home receivers, portable and even PC receivers. Automobile manufacturer's such as General Motors, Ford, Audi, and Porsch now offer RDS on new vehicles. Yet despite all the support equipment in place, the FM broadcaster has been reluctant to implement and utilize this service, mainly because of a lack of understanding of what RDS can do for the station. This book finally provides the information required to understand RDS and its possibilities on a variety of levels, so that everyone involved in radio can make the most of it. Station owner, program director, salesperson, and talent alike will find the information he or she requires to maximize the possibilities of this new technology. Each feature of the system is explained in terms of its practical implementation at the station, and interviews with broadcasters currently using the system add a hands-on perspective. Scott Wright is a recognized pioneer in RDS development. As the designer of Delco Electronics' first RDS receiver, he has been extremely active in the development of the RDS standard in the US and in efforts to educate the broadcast community about its potential. He has represented Delco at the European Broadcasting Union's (EBU) RDS Forum and is currently the Chairman of the National Radio Systems Committee RBDS Subcommittee, the US standard-setting body. He is also a member of the Electronics Industries Association's (EIA) RDS Forum.
