**The Report: Indonesia 2014**-Oxford Business Group  
2014-05-21 On the cusp of 2014 national elections and the 2015 integration of the ASEAN Economic Community, Indonesia is poised to continue its rapid economic expansion. While the country's natural resources are still plentiful, by channelling foreign direct investment into the right areas, the government is ensuring that true potential, in terms of value and manufacturing, is achieved. By inviting targeted investment and adapting existing regulatory frameworks, the government has taken significant steps to facilitate foreign investment and the development of value-added industries. Indonesia is a country renowned for its abundance of natural resources, which include oil, gas, coal, nickel, tin, copper, gold and silver. While slightly down on the previous year, the country's total oil production for 2012 stood at 861,000 barrels per day, accounting for approximately 1.2% of the world's oil production. Indonesia remains the world's largest exporter of thermal coal, exporting a total of 304m tonnes in 2012 to countries such as Japan, South Korea, China and India. The country continues to be the dominant nation in South-east Asia politically and economically, and its participation within ASEAN in particular will likely determine the shape of

regional integration, with the introduction of the ASEAN Economic Community (AEC) in 2015 looming as the bloc's next major milestone.

Kowe nulis hestek #AkuRapopo we aku wis bahagia .... Hanya Tony Stark yang bias membendung cintaku padamu. Kata pepatah, "Tak kenal maka tak sayang". Nah, kitakan, sudah saling kenal, terus kapan kamu sayangnya? Ditolak kamu saja aku sudah edan setengah mati, apalagi ditolak rakyat, untung kemarin aku ndak nyaleg. Saat membaca blognya saja tidak cukup membuatmu puas, buku ini menyediakan cerita-cerita kocak ala Gus Mul, yang runut dengan bantuan catatan untuk kamu yang kurang fasih berbahasa Jawa. Jangan heran kalau buku yang agak tebal

**Plant Molecular Biology Manual**-Stanton Gelvin  
2012-12-06 Five years ago, the first edition of the Plant Molecular Biology Manual appeared. At that time, the editors felt that the field of plant molecular biology had matured to a point that the publication of a series of protocols in plant molecular biology was warranted. During the past five years, the field of plant molecular biology has expanded rapidly. This expansion is, among other things, reflected by the presence of several journals in the plant sciences, as well as by the increasing amount of plant sciences articles that are published in the more general journals. In 1991 approximately 3000 people attended the Third International Congress of Plant Molecular Biology in Tucson, Arizona, where more than 2000 posters were presented. It is also remarkable to see that nowadays botanical and physiological meetings pay a considerable amount of attention to plant molecular biology. Since the first edition of this manual appeared, we have published,

yearly, a series of supplements to the original volume. These supplements covered new subjects and described new methods that had been developed. With time, however, the editors realized that the original manual plus supplements had become cumbersome to use, and we decided to publish a reorganized version of the manual.

**Advances in Metaheuristic Algorithms for Optimal Design of Structures-A.** Kaveh 2016-11-09 This book presents efficient metaheuristic algorithms for optimal design of structures. Many of these algorithms are developed by the author and his colleagues, consisting of Democratic Particle Swarm Optimization, Charged System Search, Magnetic Charged System Search, Field of Forces Optimization, Dolphin Echolocation Optimization, Colliding Bodies Optimization, Ray Optimization. These are presented together with algorithms which were developed by other authors and have been successfully applied to various optimization problems. These consist of Particle Swarm Optimization, Big Bang-Big Crunch Algorithm, Cuckoo Search Optimization, Imperialist Competitive Algorithm, and Chaos Embedded Metaheuristic Algorithms. Finally a multi-objective optimization method is presented to solve large-scale structural problems based on the Charged System

Search algorithm. The concepts and algorithms presented in this book are not only applicable to optimization of skeletal structures and finite element models, but can equally be utilized for optimal design of other systems such as hydraulic and electrical networks. In the second edition seven new chapters are added consisting of the new developments in the field of optimization. These chapters consist of the Enhanced Colliding Bodies Optimization, Global Sensitivity Analysis, Tug of War Optimization, Water Evaporation Optimization, Vibrating Particle System Optimization and Cyclical Parthenogenesis Optimization algorithms. A chapter is also devoted to optimal design of large scale structures.
