Building Literacy in Social Studies-Donna Ogle 2007 Preparing students to be active, informed, literate citizens is one of the primary functions of public schools. But how can students become engaged citizens if they can't read, let alone understand, their social studies texts? What can educators--and social studies teachers in particular--do to help students develop the knowledge, skills, and motivation to become engaged in civic life? Building Literacy in Social Studies addresses this question by presenting both the underlying concepts and the research-based techniques that teachers can use to engage students and build the skills they need to become successful readers, critical thinkers, and active citizens. The authors provide targeted strategies--including teaching models, graphic organizers, and step-by-step instructions--for activities such as * Building vocabulary, * Developing textbook literacy skills, * Interpreting primary and secondary sources, * Applying critical thinking skills to newspapers and magazines, and * Evaluating Internet sources. Readers will also learn how to organize classrooms into models of democracy by creating learning communities that support literacy instruction, distribute authority, encourage cooperation, and increase accountability among students. Realistic scenarios depict a typical social studies teacher's experience before and after implementing the strategies in the classroom, showing their potential to make a significant difference in how students respond to instruction. By making literacy strategies a vital part of content-area instruction, teachers not only help students better understand their schoolwork but also open students' eyes to the power that informed and engaged people have to change the world.

Ditch That Textbook-Matt Miller 2015-04-13 Textbooks are symbols of centuries-old education. They're often outdated as soon as they hit students' desks. Acting "by the textbook" implies compliance and a lack of creativity. It's time to ditch those textbooks--and those textbook assumptions about learning In Ditch That Textbook, teacher and blogger Matt Miller encourages educators to throw out meaningless, pedestrian teaching and learning practices. He empowers them to evolve and improve on old, standard, teaching methods. Ditch That Textbook is a support system, toolbox, and manifesto to help educators free their teaching and revolutionize their classrooms.

Fear on Trial-John Henry Faulk 2010-06-28 John Henry Faulk was a popular radio and television personality during the McCarthy era. He was host of his own radio program on WCBS in New York when he publicly challenged AWARE, Inc., an ultrapatriotic group engaged in the systematic blacklisting of entertainment personalities. In response, an AWARE bulletin accused Faulk himself of subversive associations. Angry and frightened by this accusation, Faulk brought suit against AWARE, charging conspiracy to libel him and to destroy his career. Thus began one of the great civil rights cases of this century. John Henry Faulk recounts the story of this harrowing time in Fear on Trial, the dramatic account of his six years on the "blacklist"—an exile that began with the AWARE bulletin and ended with his vindication by a jury award of \$3,500,000—the largest libel award in U.S. history at that time. The heart of the book is the trial of Faulk's libel action against AWARE, in which attorney Louis Nizer relentlessly exposed the blacklist for what it was—a cynical disdain

of elementary decency couched in the rhetoric of patriotism. Many of the people involved in the Faulk case were and are famous: attorneys Nizer and Roy Cohn; Edward R. Murrow and Charles Collingwood; Myrna Loy, Kim Hunter, Tony Randall, and Lee Grant; J. Frank Dobie; Ed Sullivan, David Susskind, and Mark Goodson. But the hero is Faulk himself, a man who—in the words of Studs Terkel—"faced the bastards and beat them down."

The Brain That Changes Itself-Norman Doidge 2017-04-03 An astonishing new scientific discovery called neuroplasticity is overthrowing the centuries-old notion that the adult human brain is fixed and unchanging. It is, instead, able to change its own structure and function, even into old age. Psychiatrist and researcher Norman Doidge, MD, travelled around the United States to meet the brilliant scientists championing neuroplasticity, and the people whose lives they've transformed - people whose mental limitations or brain damage were previously seen as unalterable, and whose conditions had long been dismissed as hopeless. We see a woman born with half a brain that rewired itself to work as a whole; a woman labelled retarded who cured her deficits with brain exercises and now cures those of others; blind people who learn to see; learning disorders cured; IQs raised; ageing brains rejuvenated; stroke patients recovering their faculties; children with cerebral palsy learning to move more gracefully; entrenched depression and anxiety disappearing; and lifelong character traits changed. Doidge takes us onto terrain that might seem fantastic. We learn that our thoughts can switch our genes on and off, altering our brain anatomy. We learn how people of average intelligence can, with brain exercises, improve their cognition and perception, develop muscle strength, or learn to play a musical instrument - simply by imagining doing so. Using personal stories from the heart of this neuroplasticity revolution, Dr Doidge has written an immensely moving, inspiring book that will permanently alter the way we look at our brains, human nature, and human potential.
