Regulation of Tissue Oxygenation, Second Edition-Roland N. Pittman 2016-08-18 This presentation describes various aspects of the regulation of tissue oxygenation, including the roles of the circulatory system, respiratory system, and blood, the carrier of oxygen within these components of the cardiorespiratory system. The respiratory system takes oxygen from the atmosphere and transports it by diffusion from the air in the alveoli to the blood flowing through the pulmonary capillaries. The cardiovascular system then moves the oxygenated blood from the heart to the microcirculation of the various organs by convection, where oxygen is released from hemoglobin in the red blood cells and moves to the parenchymal cells of each tissue by diffusion. Oxygen that has diffused into cells is then utilized in the mitochondria to produce adenosine triphosphate (ATP), the energy currency of all cells. The mitochondria are able to produce ATP until the oxygen tension or PO2 on the cell surface falls to a critical level of about 4-5 mm Hg. Thus, in order to meet the energetic needs of cells, it is important to maintain a continuous supply of oxygen to the mitochondria at or above the critical PO2 . In order to accomplish this desired outcome, the cardiorespiratory system, including the blood, must be capable of regulation to ensure survival of all tissues under a wide range of circumstances. The purpose of this presentation is to provide basic information about the operation and regulation of the cardiovascular and respiratory systems, as well as the properties of the blood and parenchymal cells, so that a fundamental understanding of the regulation of tissue oxygenation is achieved.

Unbound-Dean King 2010-03-24 In October 1934, the Chinese Communist Army found itself facing annihilation, surrounded by hundreds of thousands of Nationalist soldiers. Rather than surrender, 86,000 Communists embarked on an epic flight to safety. Only thirty were women. Their trek would eventually cover 4,000 miles over 370 days. Under enemy fire they crossed highland awamps, climbed Tibetan peaks, scrambled over chain bridges, and trudged through the sands of the western deserts. Fewer than 10,000 of them would survive, but remarkably all of the women would live to tell the tale. Unbound is an amazing story of love, friendship, and survival written by a new master of adventure narrative.

Pryor 'This series has yet to disappoint, and this was my favorite book in the series, so far! ...The ground work for plot twists to come was masterfully laid out, and realized in this edge-of-your-seat romance between Sophia and Jask Tao... I could not put it down, and I absolutely loved the ride! A must read!' 5/5 Moonrise Book Blog 'I am officially addicted to this series. Why, you ask? Because Lindsay Pryor is my kind of fearless author. She isn't afraid to "go there", to create characters and situations that challenge me as a reader.' The Demon Librarian 'Not only are Pryor's characters and fathomlessly dark love stories fabulous, but her continual world building of Blackthorn blows me away.' Gravetells.com 'A shining, brilliant new talent in the Paranormal genre!' CC MacKenzie 'She writes paranormal romance mixed with urban fantasy the way I like it - clever world-building, intense characters and no easy options for them to take.' Nocturnal Book Reviews
