Routledge Handbook of Global Mental Health Nursing-Edilma Yearwood 2016-09-19 Awarded second place in the 2017 AJN Book of the Year Awards in Psychiatric and Mental Health Nursing. "I welcome, at long last, a book on global mental health targeted to nurses, the front-line health worker for billions of people around the world. The roles that nurses can, and should, play in mental health care are diverse and this book addresses both well-trod as well as emerging concerns across the continuum of care from promotion to prevention to treatment. Importantly, at the heart of this diversity is the foundation of compassion and care, the hallmark of the nursing profession." - Vikram Patel, Professor of International Mental Health and Wellcome Trust Principal Research Fellow in Clinical Science, Centre for Global Mental Health, London School of Hygiene and Tropical Medicine, UK Psychiatric disorders have consistently been identified as serious and significant global burdens of disease, yet meeting the needs of people in mental distress has not often been a priority in health care. This important reference work sets out the knowledge base for understanding the state of mental health care globally, and translating that into effective practice. The Handbook provides a historical and contemporary context of mental health care, identifies and discusses evidence-based standards of care and strategies for mental health promotion and explores the need to deliver care from interdisciplinary and community-based models, placing these imperatives within a human rights and empowerment framework. It is made up of four core sections which look at: Key and emerging issues that affect global mental health practice and research, including the social context of health; Evidence-based health promotion strategies for major areas of practice internationally; A range of country studies, reflecting different problems and approaches to mental health and mental health care internationally; and What constitutes empowering practice. The only comprehensive work looking at global perspectives on mental health nursing, this is an

invaluable reference for all students, academics and professionals involved in mental health research with an interest in global or cross-cultural issues.

Tracing Your Boer War Ancestors-Jane Marchese Robinson 2016-11-30 The Boer War took place between 1899 and 1902, just 15 years before the start of the First World War. Some 180,00 Britons , mainly volunteers , traveled 6,000 miles to fight and die in boiling conditions on the veld and atop [kopjes]. Of the over 20,000 who died more than half suffered enteric, an illness consequent on insanitary water. This book will act as an informative research guide for those seeking to discover and uncover the stories of the men who fought and the families they left behind. It will look in particular at the kind of support the men received if they were war injured and that offered to the families of the bereaved. Some pensions were available to regular soldiers and the Patriotic Fund, a charitable organization , had been resurrected at the beginning of the conflict. However for those who did not fit these categories the Poor Law was the only support available at the time. The book will explore a variety of research materials such as: contemporary national and local newspapers; military records via websites and directly through regimental archives; census, electoral, marriage and death records; records at the National Archives including the Book of Wounds from the Boer War, the Transvaal Widows' Fund and others.
