Blood and Water: Three Short Stories-Charles Jay Harwood 2012-11-01 Three poignant short stories about repressed emotions and personal discoveries, the opening story, Blood and Water, relates on Abby, a young girl who makes an unpleasant discovery about her family. The following story, Dead Letter Room, samples the mundane life of Finch, a loner at his place of work. But what secrets does he hide? And finally, What Simon Knows is not what everyone thinks. Reads to fit a spare moment. With excerpt of the author's novels. Collectively, these short stories are 5,200 words in length.

Blood in Water 8 Short Stories-Madeleine Watson Between 2011 and 2014, I wrote eight short stories. I had been writing stories since I was about six. Weird scenarios would enter my head and I would feel compelled to write about them. Blood in Water relates on Abby who makes an awful discovery about her family. Dead Letter Room samples the life of lonely Finch at his workplace. Outside enters the disturbed mind of an ex-convict and What Goes Around considers the makings of a bully. On the surface all appear to delve into diverse worlds and minds. But this isn't quite so. They are all about alienation. My other stories are the same: alienation. It goes right back to my early children's mysteries of the Seventies. How strange. I hadn't noticed. The reason is that I would make my own personal discovery in 2016. I was fifty-one years old and living with my partner and two children. Until then, I was completely unaware of a vital truth about myself. This truth has leaked into my stories and creations without my realisation. This account is true. Relevant diary entries have been included as well as illustrations. Analyses and further dissections provides an insight into the force behind these stories, and ventures into the strange phenomena I have discovered. It's like a ghost language.

Blood and Water-Briana Morgan 2017-03-04 Seventeen-year-old Jay Harris lives in a world struck down by a deadly virus. His parents are dead, along with half the planet. When Jay's sister Maia falls ill, he must find a cure before he loses her, too. But unbeknownst to Maia, Jay is also sick... and he's running out of time to save them both. When Jay's friends tell him there might be a cure for him in France, he must decide whether to pursue it. The journey will be difficult and dangerous, especially in his weakened state, but with little time left-for himself and for Maia-it soon becomes clear there's no other choice. Jay leaves the relative comfort of London to search for help, knowing he may never find it. Along the way, he experiences the effects of disaster on the bonds of friendship and fluctuating notions of family. These teens, decimated by a dangerous plague, face stark choices in their search for help, not knowing if their efforts will end in loss and pain. Will Jay and Maia find a cure before the virus takes them?

Like Blood in Water- 2007-03-11 A surrealist account of the creative and descriptive arts. In these five surrealist collages, waking life continually gives way before the onslaught of dreams. Yuriy Tarnawsky has condensed the vastness of scope typical of novels into shorter fragments—mininovels—that require the reader's active participation. The tone is a balance of dead-pan comedy and solemn gothic, sometimes a near-parody of wide-eyed candor, sometimes recounting utterly mad or barely conceivable states of affairs. A candidate for major surgery struggles unsuccessfully to avoid it. Two strangers meet, and eventually marry, after participating in scream therapy. A pianist stops playing because he believes his hand is not there when he sits at the keyboard. A character sees the giant blue and white flowers he has craved his whole life only at the instance of his electrocution. Tyler Pavarotti, a tailor, voluntarily takes a role in a production in which he will be killed. Tarnawsky's language is elegant and careful, and his studied concentration of rhythm allows his work to transcend prose, nestling somewhere within the realm of musical composition. Both tragic and beautiful, in these stories life dissolves in time like blood in water.

Blood and Water-Gary C. Hassmann M.D. 2018-08-07 The sacrificial death of Jesus Christ is the most important and cherished event in human history. Still, the accurate cause of how Jesus died remains a mystery to this day. Dr. Gary Hassmann relies on his years of experience as a physician and surgeon to utilize his findings gathered from three decades of extensive scriptural studies, medical research, and pilgrimages to the Holy Land and Rome to unravel and solve the mystery of how Jesus died. By shining a fresh light on the prophetic scriptures, the transcendence of blood and water, the effects of the Christ event such as redemption and reconciliation, and a new perspective collected from the twenty-first century medical sciences, Dr. Hassmann invites others to contemplate a fascinating theory about Christ's death and ultimately glean more robust spiritual truths about God's meaning and prophetic messages. Blood and Water presents original research of the sacred scriptures and the modern medical sciences that faithfully and thoughtfully deciphers and solves the mystery of how Jesus died.

Blood and Water-David Gilmartin 2020-04-14 The Indus basin was once an arid pastoral watershed, but by the second half of the twentieth century, it had become one of the world's most heavily irrigated and populated river basins. Launched under British colonial rule in the nineteenth century, this irrigation project spurred political, social, and environmental transformations that continued after the 1947 creation of the new states of India and Pakistan. In this first large-scale environmental history of the region, David Gilmartin focuses on the changes that occurred in the basin as a result of the implementation of the world's largest modern integrated irrigation system. This masterful work of scholarship explores how environmental transformation is tied to the creation of communities and nations, focusing on the intersection of politics, statecraft, and the environment.

Blood and Water-J. R. Castle 2020-12-08 Kardia's father taught her that with a little bit of hope, nothing was impossible. So, Kardia held onto the hope that someday her family would have full bellies again. She dared to hope that one day, her old friends would start being kind to one another. And more than anything, she hoped that eventually, her beloved town would find a way to revive itself before the new Regent of their Province came toazing. Because as it was, her family had to forage for scraps to survive. Her friends treat each other as enemies. And if the Regent arrived to find Goia in its current state, he would end up casting everyone out of their homes and off his land. Then it happened! Her hope was finally to be rewarded. A visitor came to town with a strange request. Dadda traded a portion of his land to a man covered with tattoos in return for a vast amount of gold coins. With their new riches, her family had plenty to eat and a fine home to live in. And her beloved Goia began to thrive once again. One problem. The contract stated that the sorcerer got everything that was on the traded parcel of land at the time of the transaction. Which included Kardia! The crafty sorcerer was after Kardia and her Sano healing powers all along. Kardia must find a way out of the contract before the allotted time is up, or their good fortunes and answered wishes will end up costing the townspeople of Goia their freedom and Kardia her life... The Gospel of John-J. Ramsey Michaels 2010-09-16 This new commentary — part of Eerdmans's acclaimed NICNT series — gives primary attention to John's gospel in its present form rather than the sources or traditions behind it. J. Ramsey Michaels assumes that the John who authored the book is someone very close to Jesus and, therefore, that the gospel is a testimony to events that actually happened in the life of Jesus. Yet Michaels does not ignore the literary character of the gospel of John or its theological contribution to the larger Christian community from its own time to the present day. Through a detailed verse-by-verse commentary, Michaels reveals how the gospel of "the disciple whom Jesus loved" is a unified composition, intertwined with the synoptics, yet drawing on material none of them cover.

Regulation of Tissue Oxygenation, Second Edition-Roland N. Pittman 2016-08-18 This presentation describes various aspects of the regulation of tissue oxygenation, including the roles of the circulatory system, respiratory system, and blood, the carrier of oxygen within these components of the cardiorespiratory system. The respiratory system takes oxygen from the atmosphere and transports it by diffusion from the air in the alveoli to the blood flowing through the pulmonary capillaries. The cardiovascular system then moves the oxygenated blood from the heart to the microcirculation of the various organs by convection, where oxygen is released from hemoglobin in the red blood cells and moves to the parenchymal cells of each tissue by diffusion. Oxygen that has diffused into cells is then utilized in the mitochondria to produce adenosine triphosphate (ATP), the energy currency of all cells. The mitochondria are able to produce ATP until the oxygen tension or PO2 on the cell surface falls to a critical level of about 4-5 mm Hg. Thus, in order to meet the energetic needs of cells, it is important to maintain a continuous supply of oxygen to the mitochondria at or above the critical PO2 . In order to accomplish this desired outcome, the cardiorespiratory system, including the blood, must be capable of regulation to ensure survival of all tissues under a wide range of circumstances. The purpose of this presentation is to provide basic information about the operation and regulation of the cardiovascular and respiratory systems, as well as the properties of the blood and parenchymal cells, so that a fundamental understanding of the regulation of tissue oxygenation is achieved.

Blood on the Water-David Burton 2015-02-01 Picking up immediately after the conclusion of Burton's exciting novel Blood Justice, Blood on the Water opens as Justine, vampire Simone Gireaux and their mortal friend Teresa Diaz bring long-delayed vengeance to the man who murdered Justine's own mother more than twenty years earlier. Now they have one more mystery to solve: the whereabouts of Teresa's abducted daughter, Antonia. Their Nemesis in Blood Justice, Stephan Sinakov, had told them that Antonia was "sold"—but to whom, and for what purpose, they can only speculate. Confident that Antonia isn't dead, the three women seek help from old contacts of Simone's in Massachusetts. They are plunged into a world of magic and sorcery, where powerful witches struggle for control of an underground network. This battle involves plenty of fighting with mundane weapons and high-tech gadgetry as well as spells and psychic power. Helping Teresa, Justine and Simone in their quest proves to have a very high cost for their friends. But in the course of their adventures, Teresa learns that she herself is heir to a gift of magic power she had never before suspected. As the three follow clues that take them down the Eastern seaboard, Teresa struggles to learn how to control and use her abilities in a trial by fire. Ultimately, Antonia is traced to a yacht owned by a mysterious and unimaginably wealthy vampire. Meanwhile, both allies and old foes from Blood Justice are pursuing the three women from California. But the truth about Antonia's abduction may shatter Teresa's determination to reclaim her daughter.

Physiology of Elasmobranch Fishes-Trevor J. Shuttleworth 2012-12-06 There can be little doubt that, to use the parlance of the advertising world, the elasmobranch fishes have a "high profile image" in today's world. To most members of the general public they are seen as terrors of the deep, perfect aquatic predators, and the stars (or more accurately, the villains) of major Hollywood movie films and innumerable television nature programmes. Such an image belies the fact that the vast majority of elasmobranch species feed on invertebrates and that, for man, the threat from shark attack is infinitesimal compared with even being struck by lightning! Similarly, there can be few biologists who have not carried out the classic vertebrate dissection of the dogfish at some stage early in the formative years of their scientific education. Yet elasmobranch species make up only a small proportion, perhaps little more than 1%, of all vertebrates, and there are probably nearly 50 times as many teleost species as there are elasmobranchs. It is also curious that, as subjects for modern research, elasmobranchs seem to be chosen sometimes for their unique physiological characteristics and at other times because they represent excellent model systems for the study of some general process. Equally, it is for both these, seemingly contradictory, reasons that this book was proposed.

Blood Water Paint-Joy McCullough 2019-03-05 "When I finished this novel, I knew I would be haunted and empowered by Artemisia Gentileschi's story for the rest of my life."--Amanda Lovelace, bestselling author of the princess saves herself in this one A William C. Morris Debut Award Finalist 2018 National Book Award Longlist Her mother died when she was twelve, and suddenly Artemisia Gentileschi had a stark choice: a life as a nun in a convent or a life grinding pigment for her father's paint. She chose paint. By the time she was seventeen, Artemisia did more than grind pigment. She was one of Rome's most talented painters, even if no one knew her name. But Rome in 1610 was a city where men took what they wanted from women, and in the aftermath of rape Artemisia faced another terrible choice: a life of silence or a life of truth, no matter the cost. He will not consume my every thought. I am a painter. I will paint. Joy McCullough's bold novel in verse is a portrait of an artist as a young woman, filled with the soaring highs of creative inspiration and the devastating setbacks of a system built to break her. McCullough weaves Artemisia's heartbreaking story with the stories of the ancient heroines, Susanna and Judith, who become not only the subjects of two of Artemisia's most famous paintings but sources of strength as she battles to paint a woman's timeless truth in the face of unspeakable and all-too-familiar violence. Water & Blood-Phil Hinsley 2014-10-23 “What did he say?” “He made himself equal with God!” “This blasphemer must die!” There were many who heard what he said and stopped following him because his teaching was offensive to them. Today many do not know what he actually said and often his words are ignored or misrepresented. The history of the church is one of divisions over what he taught and many counterfeit accounts of his teaching have gained acceptance. This account will surprise and perhaps even shock many. What did he look like? What did he teach about heaven and hell? What happens to us when we die? What day did he die on? What caused his death? What day did he rise from the dead? Why will he return? What was his message in one short sentence? We have got it all wrong

Blood, Salt, Water-Denise Mina 2015-12-01 Detective Alex Morrow discovers that the darkest secrets never stay buried as she investigates the criminal underbelly of a seemingly tranquil seaside town. For reasons she can't quite explain, Alex Morrow is addicted to watching surveillance footage of Roxanna Fuentecilla—a gorgeous Spanish mother of two, in a tempestuous relationship with her boyfriend, who recently relocated to Glasgow under mysterious circumstances. She is also Morrow's prime suspect in an investigation that resembles a soap opera, filled with glamorous jetsetters and enough money to interest the highest levels of law enforcement. Until Roxanna vanishes. Morrow traces Roxanna's steps to Helensburgh, a sleepy, picturesque seaside community. But behind the idyllic Victorian homes and quaint storefronts, darkness lurks. Home to a man with blood on his hands who is haunted by guilt, a mysterious woman with ulterior motives back in town for the first time in decades, a sexually frustrated restaurateur looking to blow off steam, and a crew of vicious small-time gangsters blindly following orders, it's a town ruled by base instincts where no one is quite what they seem. And it's the perfect place to get rid of someone. When she uncovers an unsettling connection to Roxanna's job back in Glasgow, Morrow suspects that her missing person is more than a white-collar criminal on the lam--she may also be a victim caught up in a sophisticated conspiracy that stretches far beyond Helensburgh and is more personal than Morrow ever imagined. As the truth rises to the surface and the conflicts that lie beneath Helensburgh's calm waters threaten to explode, Morrow must find Roxanna before any hope of solving the case disappears with her. A gripping tale of greed, power, and vengeance, Blood, Salt, Water is a masterful crime novel from Denise Mina that confirms her reputation as "one of the genre's brights stars" (George Pelecanos).

The Encyclopedia of the Stone-Campbell Movement-Douglas A. Foster 2004 "Over ten years in the making, The Encyclopedia of the Stone-Campbell Movement offers for the first time a sweeping historical and theological treatment of this complex, vibrant global communion. Written by more than 300 contributors, this major reference work contains over 700 original articles covering all of the significant individuals, events, places, and theological tenets that have shaped the Movement. Much more than simply a historical dictionary, this volume also constitutes an interpretive work reflecting historical consensus among Stone-Campbell scholars, even as it attempts to present a fair, representative picture of the rich heritage that is the Stone-Campbell Movement."--BOOK JACKET.
