The Complete Witch Twins Series-Adele Griffin 2013-12-10 A special four-in-one edition of bestselling author Adele Griffin's funny *Witch Twins* fantasy series In *Witch Twins*, though identical on the outside, ten-year-old twins Claire and Luna Bundkin are as different on the inside as peaches and peanut butter. Claire is mischievous and Luna is a dreamer, but they do share a favorite hobby: witchcraft. Whether it's making breakfast or washing dishes, there's nothing a five-star witch can't accomplish with a wave of her pinkie finger. When Claire and Luna's father announces that he's getting remarried, the twins know they need to do something to stop the wedding. A spell might be the only way to save their dad, and they'll try anything. Even if magic usually lands them in a pot of trouble. In *Witch Twins and Melody Malady*, Claire Bundkin has been Melody Malady's most devoted fan ever since the singing sensation was selling *Sudsy Perfect Shampoo* on TV. When Claire gets a chance to meet Melody, she just about does a flip. And when Melody offers her a part in her upcoming movie, Claire knows her life is about to change forever. But Claire's twin sister, Luna, isn't quite as excited about Claire's shot at the big time. It can get pretty ugly whenever sisters disagree, but for these witches-in-training, it may be downright dangerous. In *Witch Twins and the Ghost of Glenn Bly*, Claire and Luna are thrilled when they find out their grandparents have been invited to an all-seniors golf tournament in Scotland, and they want the twins to come along. Claire and Luna can't wait to set eyes on a real Scottish castle, with horses, armor, and tea at four o'clock. But this castle offers one amenity they weren't expecting—a ghost! And in *Witch Twins at Camp Bliss*, Claire cannot wait for five weeks in the sun at Camp Bliss, where she just knows she's going to be crowned Camp Bliss Girl. But Luna is shy, awkward, and would rather spend the summer at home with her cats. To improve Luna's attitude, the twins' grandmother slips her a vial of thrice-distilled *Marigold Zest*, a pinch of which can make even the most reluctant spellcaster hungry for adventure. But when the vial disappears their first week at camp, and strange things start happening, Claire and Luna will have to stop the mischief maker—without breaking their promise to leave the spells at home!

Wisdom Is Bliss-Robert Thurman 2021-08-03 "Robert Thurman is a living treasure, one of today's most provocative spiritual thinkers." - Daniel Goleman, author of Emotional Intelligence Robert Thurman, the preeminent scholar and interpreter of Tibetan Buddhist philosophy for the modern world, leads us on a joyful exploration into the nature of reality through Buddha's threefold curriculum of "super-education." "Buddha had to be an educator, rather than a prophet or religion founder, since he had achieved his goal of exact and complete understanding of reality by using reason, experiments to open his own mind, and vision to do so," Thurman writes. "From his own experience, he could help [others] as a teacher by streamlining the process. He could not just transplant his realization into their minds. They could not get their own realizations just by believing whatever he said. He could only provide them with a prospect of full realization along a path of learning and experiencing they could follow—they would have to travel on their own." This book is your invitation to travel that same road. Deeply felt and bracingly direct, it doesn't teach about the teaching—it is the teaching. Get ready to get real, and have fun along the way, as you chart a path to reliable, lasting happiness.

Sorrow and Bliss-Meg Mason 2021-02-09 "Improbably charming...will have you chortling and reading lines aloud." —PEOPLE A compulsively readable debut novel—spiky, sharp, intriguingly dark, and tender—about a woman on the edge that combines the psychological insight of Sally Rooney with the sharp humor of Nina Stibbe and the emotional resonance of Eleanor Oliphant Is Completely Fine. Martha Friel just turned forty. Once, she worked at Vogue and planned to write a novel. Now, she creates internet content. She used to live in a pied-à-terre in Paris. Now she lives in a gated community in Oxford, the only person she knows without a PhD, a baby or both, in a house she hates but cannot bear to leave. But she must leave, now that her husband Patrick—the kind who cooks, throws her birthday parties, who loves her and has only ever wanted her to be happy—has just moved out. Because there's something wrong with Martha, and has been for a long time. When she was seventeen, a little bomb went off in her brain and she was never the same. But countless doctors, endless therapy, every kind of drug later, she still doesn't know what's wrong, why she spends days unable to get out of bed or alienates both strangers and her loved ones with casually cruel remarks. And she has nowhere to go except her childhood home: a bohemian (dilapidated) townhouse in a romantic (rundown) part of London—to live with her mother, a minorly important sculptor (and major drinker) and her father, a famous poet (though unpublished) and try to survive without the devoted, potty-mouthed sister who made all the chaos bearable back then, and is now too busy or too fed up to deal with her. But maybe, by starting over, Martha will get to write a better ending for herself—and she'll find out that she's not quite finished after all.

Posthuman Bliss?-Susan B. Levin 2020-12-03 A tightly argued and expansive examination of the pitfalls of transhumanism that reacquaints us with what it means to live well. Advocates of transhumanism, or "radical" enhancement, urge us to pursue the biotechnological heightening of select capacities - above all, cognitive ability - so far beyond any human limit that the beings with those capacities would exist on a higher ontological plane. For proponents of such views, humanity's self-transcendence through advancements in science and technology may even be morally required. Consequently, the human stakes of how we respond to transhumanism are immeasurably high. In *Posthuman Bliss? The Failed Promise of Transhumanism*, Susan B. Levin challenges transhumanists' overarching commitments regarding the mind and brain, ethics, liberal democracy, knowledge, and reality, showing their notion of humanity's self-transcendence into "posthumanity" to be little more than fantasy. Uniting philosophical with scientific arguments, Levin mounts a significant challenge to transhumanists' claim that science and technology support their vision of posthumanity. In a clear and engaging style, she dismantles transhumanists' breezy assurances that posthumans will emerge if we but allocate sufficient resources to that end. Far from offering theoretical and practical "proof of concept" for the vision that they urge upon us, Levin argues, transhumanists engage inadequately with cognitive psychology, biology, and neuroscience, often relying on questionable or outdated views within those fields. Having shown in depth why transhumanism should be rejected, Levin argues forcefully for a holistic perspective on living well that is rooted in Aristotle's virtue ethics but that is adapted to liberal democracy. This holism is thoroughly human, in the best of senses: It directs us to consider worthy ends for us as human beings and to do the irreplaceable work of understanding ourselves rather than relying on technology and science to be our salvation.

Bliss Brain-Dawson Church 2020-09-15 Award Winner in the Science category of the 2020 Best Book Awards sponsored by American Book Fest Award-winning author and thought leader Dawson Church, Ph.D., blends cutting-edge neuroscience with intense firsthand experience to show you how you can rewire your brain for happiness-starting right now. Neural plasticity-the discovery that the brain is capable of rewiring itself-is now widely understood. But what few people have grasped yet is how quickly this is happening, how extensive brain changes can be, and how much control each of us has over the process. In *Bliss Brain*, famed researcher Dawson Church digs deep into leading-edge science, and finds stunning evidence of rapid and radical brain change. In just eight weeks of practice, 12 minutes a day, using the right techniques, we can produce measurable changes in our brains. These make us calmer, happier, and more resilient. When we cultivate these pleasurable states over time, they become traits. We don't just feel more blissful as a temporary state; the changes are literally hard-wired into our brains, becoming stable and enduring personality traits. The startling conclusions of Church's research show that neural remodeling goes much farther than scientists have previously understood, with stress circuits shriveling over time. Simultaneously, "The Enlightenment Circuit"-associated with happiness, compassion, productivity, creativity, and resilience-expands. During deep meditation, Church shows how "the 7 neurochemicals of ecstasy" are released in our brains. These include anandamide, a neurotransmitter that's been named "the bliss molecule" because it mimics the effects of THC, the active ingredient in cannabis. It boosts serotonin and dopamine; the first is an analog of psilocybin, the second of cocaine. He shows how cultivating these elevated emotional states literally produces a self-induced high. While writing *Bliss Brain*, Church went through a series of disasters, including escaping seconds ahead of a California wildfire that consumed his home and office and claimed 22 lives. The fire triggered a painful medical condition and a financial disaster. Through it all, Church steadily practiced the techniques of *Bliss Brain* while teaching them to thousands of other people. This book weaves his story of resilience into the fabric of neuroscience, producing a fascinating picture of just how happy we can make our brains, no matter what the odds.
