I Was Blind but Now I See-Sylvia Darby 2020-11-13 At the age of seventeen, a female committed a crime against her attacker, a male rapist. She committed arson and murder as a method of revenge for his attack upon her. The incident was reported as an unsolved murder for many years. She joined the church and was noted as a Christian. She was sure she had gotten away with murder. Years later, when the Holy Spirit had her revisit the year of this traumatic incident, he revealed the hand of God in the matter. She thought that the things that were happening at that time were coincidences. She later learned that they were not coincidences at all, but they were earthly occurrences under the direction of a heavenly being. Therefore, her eyes were open to the fact that the true avenger for all evil is God, and God alone. Her sin had been exposed and her secrets were revealed, and she was now found guilty. So she was now at a place where repentance was needed. The spirit revealed to her what she had to do to be forgiven. What the devil did against her for evil, God made it for good. He alone can take life’s lemons and make lemonade.

Was Blind, But Now I See-Barbara J. Flagg 1997-12-01 "Race" does not speak to most white people. Rather, whites tend to associate race with people of color and to equate whiteness with racelessness. As Barbara J. Flagg demonstrates in this important book, this "transparency" phenomenon--the invisibility of whiteness to white people-- profoundly affects the ways in whites make decisions: they rely on criteria perceived by the decisionmaker as race-neutral but which in fact reflect white, race-specific norms. Flagg here identifies this transparently white decisionmaking as a form of institutional racism that contributes significantly, though unobtrusively, to the maintenance of white supremacy. Bringing the discussion to bear on the arena of law, Flagg analyzes key areas of race discrimination law and makes the case for reforms that would bring legal doctrine into greater harmony with the recognition of institutional racism in general and the transparency phenomenon in particular. She concludes with an exploration of the meaning of whiteness in a pluralist culture, paving the way for a positive, nonracist conception of whiteness as a distinct racial identity. An informed and substantive call for doctrinal reform, Was Blind But Now I See is the most expansive treatment yet of the relationship between whiteness and law.

My Dog Is Blind ... but Lives Life to the Full!-Nicole Horsky 2019-08-20 It can seem like the end of the world when the vet tells you that, sadly, your beloved dog is going blind; it’s natural to put yourself in their place and imagine how catastrophic this news would be for you. But with life-changing events such as these, there’s one essential difference between the human and canine species: dogs won’t waste too much time feeling sorry for themselves, or asking “why me?” After taking stock, they will - with your help - adapt and get on with the joyful business of living. My Dog Is Blind ... but Lives Life to the Full! will sympathetically show the owner of the newly-blind, or already blind dog that their loyal friend is still the same, with the same zest for and enjoyment of life. With love and careful thought, you and your dog can get as much out of life as you always have, having fun and establishing an even closer bond as you help each other find new or adapted ways to live happily together.

Vision for Life, Revised Edition-Meir Schneider, Ph.D. 2016-05-03 All parts of the body need exercise for optimal health, and the eyes are no different. Vision for Life presents an approach to eye health for people with 20/20 vision who wish to maintain their perfect vision as well as people who see poorly and would like to improve their eyesight. Clients of the Meir Schneider Self-Healing Method experience their own capacity to bring about recovery, reversing the progress of a wide range of degenerative conditions including eye disease. Based in part on the established Bates Method of eyesight improvement and in part on his own professional and personal discoveries, Meir Schneider’s pioneering approach has helped thousands of people successfully treat a host of eye problems, including near- and farsightedness, astigmatism, lazy eye, double vision, glaucoma, cataracts, macular degeneration, retinal detachment, retinitis pigmentosa, and nystagmus. This revised edition includes a new chapter on children's eye health and new research and exercises for specific conditions, i.e., glaucoma and nystagmus, near- and farsightedness. Born blind to deaf parents, Schneider underwent a series of painful operations as a young child and was left with 99 percent scar tissue on the lenses of his eyes, resulting in his being declared incurably blind. At the age of seventeen, he discovered how to improve his vision from less than 1 percent to 55 percent of normal vision with the eye exercises presented in this book. Today Schneider drives a car, reads, and enjoys the benefits of full natural vision. He and his clients prove time and time again how much vision can improve with exercise. His contributions to the field of self-healing are recognized by alternative health practitioners and medical doctors alike. In Vision for Life, Schneider shares forty years of discoveries made on his personal and professional journey. The book details simple but effective techniques to gain great vision such as sunning and palming. Such exercises are not only strengthening but also restorative and deeply relaxing. The reader learns how to reverse developing issues before they cause damage or to remedy existing problems, including pathologies such as glaucoma, cataracts, macular degeneration, retinal detachment, and optic nerve neuropathy. Making Eye Health a Population Health Imperative-National Academies of Sciences, Engineering, and Medicine 2017-01-15 The ability to see deeply affects how human beings perceive and interpret the world around them. For most people, eyesight is part of everyday communication, social activities, educational and professional pursuits, the care of others, and the maintenance of personal health, independence, and mobility. Functioning eyes and vision system can reduce an adult's risk of chronic health conditions, death, falls and injuries, social isolation, depression, and other psychological problems. In children, properly maintained eye and vision health contributes to a child's social development, academic achievement, and better health across the lifespan. The public generally recognizes its reliance on sight and fears its loss, but emphasis on eye and vision health, in general, has not been integrated into daily life to the same extent as other health promotion activities, such as teeth brushing; hand washing; physical and mental exercise; and various injury prevention behaviors. A larger population health approach is needed to engage a wide range of stakeholders in coordinated efforts that can sustain the scope of behavior change. The shaping of socioeconomic environments can eventually lead to new social norms that promote eye and vision health. Making Eye Health a Population Health Imperative: Vision for Tomorrow proposes a new population-centered framework to guide action and coordination among various, and sometimes competing, stakeholders in pursuit of improved eye and vision health and health equity in the United States. Building on the momentum of previous public health efforts, this report also introduces a model for action that highlights different levels of prevention activities across a range of stakeholders and provides specific examples of how population health strategies can be translated into cohesive areas for action at federal, state, and local levels.

Miracle Dog Miracle God-John McCreedy 2013-10-14 I’m more convinced than ever that if you’re going to write a book it must come from deep inside you. I believe that’s so true regarding the writing of any good book, but particularly this volume. While my first published work “The Seer’s House” arrived in one single vision at 3 o’clock in the morning, my second endeavour “Miracle Dog; Miracle God” took a lot longer to emerge. For over ten years following my first publication, I was caught up in the mission field in Romania and literally didn’t have time to write a follow-up. Indeed, only after I’d returned from Romania and been separated from my best friend Snowbell, our Golden Retriever Labrador, did I really begin to accept that another book may be about to be birthed. I couldn’t shake off the writing of this book and so eventually I sat down and wrote it. Nevertheless, “Miracle Dog; Miracle God” hasn’t been the easiest manuscript to create for various reasons. Trying to keep to my subject matter what God the Father taught me about Himself through the love of a dog, when there was so much more to tell about our Romanian endeavours, hasn’t been straightforward. Writing each chapter as a parable was equally challenging, but in the end I think I’ve managed to produce what has been within me since 2008. Finally, the emotion I experienced writing about this remarkable little dog was quite unexpected. On numerous occasions I would have to literally down tools and shed tears, while at other times I laughed out loud and so enjoyed reminiscing about happier moments with Snowbell. My desire is that “Miracle Dog; Miracle God” will make you laugh and cry, yet also instruct you about the amazing unconditional love of God. After all, that’s exactly what happened to me when I was introduced to Snowbell, a beautiful gift from God to my life, if ever there was one.

There Plant Eyes-M. Leona Godin 2021-06-01 From Homer to Helen Keller, from Dune to Stevie Wonder, from the invention of braille to the science of echolocation, M. Leona Godin explores the fascinating history of blindness, interweaving it with her own story of gradually losing her sight. There Plant Eyes probes the ways in which blindness has shaped our ocularcentric culture, challenging deeply ingrained ideas about what it means to be "blind." For millennia, blindness has been used to signify such things as thoughtlessness ("blind faith"), irrationality ("blind rage"), and unconsciousness ("blind evolution"). But at the same time, blind people have been othered as the recipients of special powers as compensation for lost sight (from the poetic gifts of John Milton to the heightened senses of the comic book hero Daredevil). Godin—who began losing her vision at age ten—illuminates the often-surprising history of both the condition of blindness and the myths and ideas that have grown up around it over the course of generations. She combines an analysis of blindness in art and culture (from King Lear to Star Wars) with a study of the science of blindness and key developments in accessibility (the white cane, embossed printing, digital technology) to paint a vivid personal and cultural history. A genre-defying work, There Plant Eyes reveals just how essential blindness and vision are to humanity's understanding of itself and the world.

Blindness-José Saramago 2013-08-23 A stunningly powerful novel of humanity's will to survive against all odds during an epidemic by a winner of the Nobel Prize for Literature. An International Bestseller • "This is a shattering work by a literary master."—Boston Globe A city is hit by an epidemic of "white blindness" which spares no one. Authorities confine the blind to an empty mental hospital, but there the criminal element holds everyone captive, stealing food rations and raping women. There is one eyewitness to this nightmare who guides seven strangers—among them a boy with no mother, a girl with dark glasses, a dog of tears—through the barren streets, and the procession becomes as uncanny as the surroundings are harrowing. A magnificent parable of loss and disorientation, Blindness has swept the reading public with its powerful portrayal of our worst appetites and weaknesses—and humanity's ultimately exhilarating spirit. "This is a an important book, one that is unafraid to face all of the horror of the century."—Washington Post A New York Times Notable Book of the Year A Los Angeles Times Best Book of the Year
