Fanfiction and the Author-Judith Fathallah 2017 Whether you look at quantity, quality, or readership, we are in an unprecedented era of fan fiction. Thus far, however, the genre has been subject to relatively little rigorous qualitative or quantitative study--a problem that Judith May Fathallah remedies here through close analysis of fanfiction related to Sherlock, Supernatural, and Game of Thrones. Her large-scale study of the sites, receptions, and fan rejections of fanfic demonstrate how it often legitimates itself through traditional notions of authorship even as its explicit discussion and deconstruction of the author figure contests traditional discourses of authority and opens new spaces for writing that challenges the authority of media professionals.

Nationalism in Belgium-Kas Deprez 2016-07-27 This is a book about shifting national identities in Belgium. It is an attempt to show how these identities emerged and evolved. It aims at explaining why the Belgian identity, which in 1830 was so strong that it could create a new nation-state, has become so weak that today it has to accept a mere overarching role above and in competition with the new national loyalties. More and more people wonder whether this country will survive.

From Sabbath to Lord's Day-D. A. Histories of State Surveillance in Europe and Beyond-Kees Boersma 2014-05-09 Does the development of new technology cause an increase in the level of surveillance used by central government? Is the growth in surveillance merely a reaction to terrorism, or a solution to crime control? Are there more structural roots for the increase in surveillance? This book attempts to find some answers to these questions by examining how governments have increased their use of surveillance technology. Focusing on a range of countries in Europe and beyond, this book demonstrates how government penetration into private citizens' lives was developing years before the 'war on terrorism.' It also aims to answer the question of whether central government actually has penetrated ever deeper into the lives of private citizens in various countries inside and outside of Europe, and whether citizens are protected against it, or have fought back. The main focus of the volume is on how surveillance has shaped the relationship between the citizen and the State. The contributors and editors of the volume look into the question of how central government came to intrude on citizens' private lives from two perspectives: identification card systems and surveillance in post-authoritarian societies. Their aim is to present the heterogeneity of the European historical surveillance past in the hope that this might shed light on current trends. Essential reading for criminologists, sociologists and political scientists alike, this book provides some much-needed historical context on a highly topical issue.

Buddha or Karl Marx-Dr B.R. Ambedkar 2014-08-02 A comparison between Karl Marx and Buddha may be regarded as a joke. There need be no surprise in this. Marx and Buddha are divided by 2381 years. Buddha was born in 563 BC and Karl Marx in 1818 AD Karl Marx is supposed to be the architect of a new ideology-polity a new Economic system. The Buddha on the other hand is believed to be no more than the founder of a religion, which has no relation to politics or economics. Art Bum-Joy Rip 2011-03-29 "ART BUM: Guide to the Best Places to Die." Map the unmappable. Everyone is an explorer when it comes to mapping the end... life's end... your end. Everyone alive is a tourist when it comes to traveling to the lands of the dead. Get this graphic novel guide to death and dying. No life plan is complete without it. No illusion of completeness is as satisfying as this one. "ART BUM: Guide to the Best Places to Die," the new graphic novel by Joy Rip, is the ghostly story of one desperate artist's graphic blueprint for dying with the illusion of grace. Some say life begins without fear. Some say life begins with fear. We are born. We experience pain. We become fearful. We experience fear. We learn fear. We are ruled by fear. All the rules that govern the art world are rules crafted by fear and pain. The rules governing any living world... any conscious world... any human world, are rules crafted by our perceived limitations in the face of fear and pain. So why not

cut to the chase and create a work of art that simply deals head on with the one most obvious pain and limitation ruling our lives: Our fear of death. Joy Rip smiles. "This is the poor man's guide to dying. It's designed for the poor only because it aims to be a viable plan for anyone, even those with the fewest financial options, on how best to leave this world (with your head up). But everyone is welcome to use it." Take a look. A bad plan might be better than no plan at all. Just remember, it's only art.

The Rise of the Dutch New Right-Merijn Oudenampsen 2020-09-14 In the past 20 years, a wave of right-wing populist movements has swept over Europe, changing the face of European politics. The Netherlands has been one of the more iconic countries to partake in this shift. Known internationally as an emblem of progressivism and tolerance, the country soon became a frontrunner in the revival of nationalist and anti-immigrant sentiment. This is the first study to offer an extensive engagement with the ideas behind the Dutch swing to the right. The emergence of Dutch populism, this book shows, formed an integral part of a broader conservative tendency, identified as the Dutch New Right. In the US and the UK, the term New Right has been used to describe conservative backlash movements that arose in opposition to the progressive movements of the 1960s. The Dutch swing to the right, this book argues, formed a belated iteration of the New Right backlash that occurred overseas. This text will be essential reading for students and scholars in the fields of European Studies and Political Science, and Dutch politics and society more specifically.

Sherlock Holmes for the 21st Century-Lynnette Porter 2012-08-08 The 21st century is a good time to be Sherlock Holmes. He stars in the Guy Ritchie films, with Robert Downey, Jr.; an internationally popular BBC television series featuring Benedict Cumberbatch; a novel sanctioned by the Arthur Conan Doyle Estate; and dozens of additional novels and short stories, including two by Neil Gaiman. Add to this the videogames, comic books, and fan-created works, plus a potent Internet and social media presence. Holmes' London has become a prime destination for cinematic tourists. The evidence is clearly laid out in this collection of 14 new essays: Holmes and Watson are more popular than ever. The detective has been portrayed as hero, and antihero. He's tech savvy, and scientifically detached—even psychologically aberrant. He has been romantically linked to The Woman and bromantically to Watson. Whether Victorian or modern, he continues to fascinate. These essays explain why he is destined to be with us for years to come. Instructors considering this book for use in a course may request an examination copy here.
