Echoes in the Halls-Gordon McIntosh 1999-11 From the research labs at the University to remote lakes in Alberta and the Northwest Territories, Echoes in the Halls tells us the stories about the antics, the hijinks and the adventures of professors at the University of Alberta. A must-read for history buffs and University Alumni. "With so many wonderful memories, of people, events and achievements over the years, it's no wonder that the University of Alberta Drama Department holds such a large place in my heart. And it's no wonder that I still come back for opening night." - Frank Bueckert "No matter what the setting, however, I always found it immensely satisfying to teach undergraduates. It was fun. It was hard work. And there was always something further to come." - Ralph Nursall

The Chicago Food Encyclopedia-Carol Haddix 2017-08-16 The Chicago Food Encyclopedia is a far-ranging portrait of an American culinary paradise. Hundreds of entries deliver all of the visionary restauranteurs, Michelin superstars, beloved haunts, and food companies of today and yesterday. More than 100 sumptuous images include thirty full-color photographs that transport readers to dining rooms and food stands across the city. Throughout, a roster of writers, scholars, and industry experts pays tribute to an expansive--and still expanding--food history that not only helped build Chicago but fed a growing nation. Pizza. Alinea. Wrigley Spearmint. Soul food. Rick Bayless. Hot Dogs. Koreatown. Everest. All served up A-Z, and all part of the ultimate reference on Chicago and its food.

Hiking from Portland to the Coast-James D. Thayer 2016 A guidebook for hikers, bikers, and equestrians, *Hiking from Portland to the Coast* explores the many trails and logging roads that crisscross the northern portion of Oregon's Coast Range. Designed to showcase convenient "looped" routes, it also describes complete throughways connecting Portland to the coastal communities of Seaside and Tillamook. Each of the 30 trails described includes a backstory to help users appreciate the history and significance of the places through which they are traveling.

Criminal Poisoning-John H. Trestrail, III 2007-10-28 In this revised and expanded edition, leading forensic scientist John Trestrail offers a pioneering survey of all that is known about the use of poison as a weapon in murder. Topics range from the use of poisons in history and literature to convicting the poisoner in court, and include a review of the different types of poisons, techniques for crime scene investigation, and the critical essentials of the forensic autopsy. The author updates what is currently known about poisoners in general and their victims. The Appendix has been updated to include the more commonly used poisons, as well as the use of antifreeze as a poison.

Spitz and Fisher's Medicolegal Investigation of Death-Werner U. Spitz 2020-07-20 This is not just a new edition but a different book, emphasizing trauma and wound analysis. The addition of a new co-editor, Dr. Francisco J. Diaz, has brought new ideas to this fifth edition. A chapter by Doctor Jan Leetsma, world-renowned neuropathologist, has also been included. Doctor Leetsma's vast experience in forensic neuropathology will certainly enhance this book. Several chapters have been eliminated that are no longer applicable or which are adequately covered in other publications. Over time, in the past 48 years, since this book was first published, *Medicolegal Investigation of Death* has been dubbed the "Bible of Forensic Pathology." The fifth edition includes over 600 case reports and hundreds of color photographs. The cases are from files the authors have personally handled. According to author Spitz, "We have found many times analysis of small wounds will lead to understanding of a giant case—like the case in Hawaii, where a body was found under a full-size van, with a thread mark on the cheek consistent with having been hit with a black pipe used for gas lines that were found in a bucket in the rear of the van. As it turned out, this was a murder, not an accident." The book is full of such cases. This book will help you understand the details of injuries and how a person was injured and how they died and how these injuries, perhaps at first blush possibly seemingly insignificant, can shed new light on a case. *Medicolegal Investigation of Death* now embraces not just basic forensic pathology but also includes death during restraint, conscious pain and suffering and new concepts related to the interpretation of injuries by detailed wound analysis. The continued use of

simple, non-technical terminology makes this book a truly unique treatise and source of information.

The Complete Book of 1930s Broadway Musicals-Dan Dietz 2018-03-29 Despite the stock market crash of October 1929, thousands of theatregoers still flocked to the Great White Way throughout the country's darkest years. In keeping with the Depression and the events leading up to World War II, 1930s Broadway was distinguished by numerous political revues and musicals, including three by George Gershwin (Strike Up the Band, Of Thee I Sing, and Let 'Em Eat Cake). The decade also saw the last musicals by Gershwin, Jerome Kern, and Vincent Youmans; found Richard Rodgers and Lorenz Hart in full flower; and introduced both Kurt Weill and Harold Arlen's music to Broadway. In *The Complete Book of 1930s Broadway Musicals*, Dan Dietz examines in detail every musical that opened on Broadway from 1930 through 1939. This book discusses the era's major successes, notorious failures, and musicals that closed during their pre-Broadway tryouts. It includes such shows as *Anything Goes*, *As Thousands Cheer*, *Babes in Arms*, *The Boys from Syracuse*, *The Cradle Will Rock*, *The Green Pastures*, *Hellzapoppin*, *Hot Mikado*, *Porgy and Bess*, *Roberta*, and various editions of *Ziegfeld Follies*. Each entry contains the following information: Plot summary Cast members Names of all important personnel, including writers, composers, directors, choreographers, producers, and musical directors Opening and closing dates Number of performances Critical commentary Musical numbers and the performers who introduced the songs Production data, including information about tryouts Source material Details about London and other foreign productions Besides separate entries for each production, the book offers numerous appendixes, including a discography, filmography, and list of published scripts, as well as lists of black-themed and Jewish-themed productions. This comprehensive book contains a wealth of information and provides a comprehensive view of each show. *The Complete Book of 1930s Broadway Musicals* will be of use to scholars, historians, and casual fans of one of the greatest decades in musical theatre history.

Capital Losses-James M. Goode 1979 "Before the passage of critical preservation legislation in 1978, the Nation's Capital lost an irreplaceable assembly of architecturally and culturally significant buildings. Wanton destruction in the name of progress - particularly in the decades immediately following World War II - resulted in a legacy forever lost, a cultural heritage destroyed by the wrecker's ball." "In originally documenting 252 of these historic

losses, the publication of *Capital Losses* a quarter century ago created a clarion call for preservationists. By reminding us of things lost, James Goode's magisterial and poignant study represented a comprehensive call for action, a mandate for responsible stewardship of the architectural legacy of Washington, D.C. In the decades since, rising public awareness and the passage of the Historic District and Historic Landmark Protection Act in 1978 have slowed the pace of thoughtless destruction. But as this completely new and updated edition of *Capital Losses* demonstrates, vigilance remains the watchword, especially as pressures for urban growth continue to intensify." "*Capital Losses* reveals the Washington that was and how it became what it is today. This updated edition includes eighteen more treasures lost - among them Rhodes Tavern and Valley View - and ninety additional historic photographs. The 270 buildings featured here range from the earliest Georgian plantation house to the latest art deco commercial structure and include private houses, hotels, apartment houses, office and government buildings, schools, hospitals, churches, and fire stations." "Both the familiar public Washington of official landmarks and the private city of residential neighborhoods are paid tribute in this volume, dedicated to the vanished. A foreword by noted architectural historian Richard Longstreth brings the preservation story up to the present."--BOOK JACKET. Book jacket.

Design and Construction of Levees-United States. Army. Corps of Engineers 2004-10 The purpose of this manual is to present basic principles used in the design and construction of earth levees. The term levee as used herein is defined as an embankment whose primary purpose is to furnish flood protection from seasonal high water and which is therefore subject to water loading for periods of only a few days or weeks a year. Embankments that are subject to water loading for prolonged periods (longer than normal flood protection requirements) or permanently should be designed in accordance with earth dam criteria rather than the levee criteria given herein. Even though levees are similar to small earth dams they differ from earth dams in the following important respects: (a) a levee embankment may become saturated for only a short period of time beyond the limit of capillary saturation, (b) levee alignment is dictated primarily by flood protection requirements, which often results in construction on poor foundations, and (c) borrow is generally obtained from shallow pits or from channels excavated adjacent to the levee, which produce fill material that is often heterogeneous and far from ideal. Selection of the levee section is often based on the properties of the poorest material that must be used.

Tides-Jonathan White 2017-01-16 In *Tides: The Science and Spirit of the Ocean*, writer, sailor, and surfer Jonathan White takes readers across the globe to discover the science and spirit of ocean tides. In the Arctic, White shimmies under the ice with an Inuit elder to hunt for mussels in the dark cavities left behind at low tide; in China, he races the Silver Dragon, a twenty-five-foot tidal bore that crashes eighty miles up the Qiantang River; in France, he interviews the monks that live in the tide-wrapped monastery of Mont Saint-Michel; in Chile and Scotland, he investigates the growth of tidal power generation; and in Panama and Venice, he delves into how the threat of sea level rise is changing human culture—the very old and very new. *Tides* combines lyrical prose, colorful adventure travel, and provocative scientific inquiry into the elemental, mysterious paradox that keeps our planet's waters in constant motion. Photographs, scientific figures, line drawings, and sixteen color photos dramatically illustrate this engaging, expert tour of the tides.

Batavia Revisited-Larry D. Barnes 2011 *Batavia's origins can be traced back to 1801 when Joseph Ellicott, surveyor and land agent for the Holland Land Company, laid out the town's principal thoroughfares. As Batavia grew, it became incorporated as a village in 1823 and as a city in 1915. Over the years, the face of the community has undergone many changes. Mansions were built along Main Street and then largely disappeared. A number of major factories sprang up but later failed or the businesses moved on. The retail center moved out of the city's downtown and into the surrounding town of Batavia. Urban renewal dramatically altered the core of the city, as large areas were leveled and then rebuilt or*

turned into parking lots. Railroad tracks that ran through the center of the community were moved to its periphery. Traffic patterns changed as new bridges were built across Tonawanda Creek. This book documents these and other changes that occurred during the last 200 years."

Building America-Jean H. Baker 2020-02-06 An English émigré who became America's first professional architect, Benjamin Henry Latrobe put his stamp on the built landscape of the new republic. Latrobe contributed to such iconic structures as the south wing of the US Capitol building, the White House, and the Navy Yard. He created some of the early republic's greatest neoclassical interiors, including the Statuary Hall and the Senate, House, and Supreme Court Chambers. As a young man, Latrobe was apprenticed to both a leading architect and civil engineer in London, studied the European continent's architectural and engineering monuments, worked on canals, and designed private houses. After the death of his first wife, he was bankrupt and emigrated to the United States in 1796 to restart his career. For the new nation with grand political expectations, he intended buildings and engineering projects to match those aspirations. Like his patron Thomas Jefferson, Latrobe saw his neoclassical designs as a way to convey American democracy. He envisioned his engineering projects, such as the canals and municipal water systems for Philadelphia and New Orleans, as a way to unite the nation and improve public health. Jean Baker conveys the personality of this charming, driven, and often frustrated genius and the era in which he lived. Latrobe tried to establish architecture as a profession with high standards, established fees, and recognized procedures, though he was unable to collect fees and earn the living his work was worth. Like many of his peers, he speculated and found himself in bankruptcy several times. *Building America* masterfully narrates the life and legacy of a key figure in creating an American aesthetic in the new United States.

Jamie O'Rourke and the Pooka-Tomie dePaola 2002-01-14 When Jamie O'Rourke's wife leaves him alone for a week, it's up to Jamie to do the housework. But Jamie isn't just the laziest man in Ireland, he's also the messiest! When a magical pooka arrives unexpectedly and starts to do the dishes and sweep the house, Jamie thinks that maybe he's the luckiest man in Ireland as well. But will Jamie's good fortune-and his pooka's housekeeping-last? Young readers will be giggling through Tomie dePaola's delightfully funny sequel to *Jamie O'Rourke and the Big Potato*. "DePaola's jaunty storytelling pace and his snappy Irish phrases give this tale extra sparkle." Publishers Weekly, starred review

Whitman East and West-Ed Folsom 2005-04-01 In *Whitman East and West*, fifteen prominent scholars track the surprising ways in which Whitman's poetry and prose continue

to be meaningful at the beginning of the twenty-first century. Covering a broad range of issues—from ecology to children's literature, gay identity to China's May 4th Movement, nineteenth-century New York politics to the emerging field of normality studies, Mao Zedong to American film—each original essay opens a previously unexplored field of study, and each yields new insights by demonstrating how emerging methodologies and approaches intersect with and illuminate Whitman's ideas about democracy, sexuality, America, and the importance of literature. Confirming the growing international spirit of American studies, the essays in *Whitman East and West* developed out of a landmark conference in Beijing, the first major conference in China to focus on an American poet. Scholars from Asia, Europe, and North America set out to track the ways in which Whitman's poetry has become part of China's cultural landscape as well as the literary landscapes of other countries. By describing his assimilation into other cultures and his resulting transformation into a hybrid poet, these essayists celebrate Whitman's multiple manifestations in other languages and contexts.

Terra Flamma-Stuart Palley 2018 From the towering pines of Shasta Trinity National Forest, to the chaparral scrub of San Diego's Mexican border, to Yosemite and the Western Sierras, trained wildland firefighter and photojournalist Stuart Palley documents California's raging wildfires and the forces behind them during the state's worst fire season in modern history. The dramatic images, a half-decade in the making, capture

the simultaneous beauty and destruction that wildfires bring as fire seasons get longer and more deadly, expensive, and destructive. In the wake of California's record-breaking series of wildfires in 2017, the images encompass five fire seasons and forty-five fires. They are presented chronologically and culminate with the wine country fire siege that devastated Sonoma and Napa counties in October 2017 and the Thomas Fire in Southern California, the largest in recorded state history. This timely book defines the state's drought and urban sprawl challenges, drawing a broader picture of global warming and its acute effects worldwide.

Sargent and the Sea-John Singer Sargent 2009 Ships and the sea through the eyes of one of the most remarkable painters of the early 20th century As a young man the American painter John Singer Sargent (1856-1925) was passionate about the sea and deeply knowledgeable about ships and seafaring. Between the ages of 18 and 23 he started his career as a professional painter with a remarkable range of maritime works that form the subject of this exhibition and book. The key works are the two versions of the Oyster Gatherers of Cancale, painted in 1878 on the northern coast of Brittany in France, and the group of studies and sketches around them. The authors relate Sargent's freely handled marine drawings, large and small, to his watercolors, oil sketches, and finished oil paintings of marine subjects. The works demonstrate his transition from a plein-air painter to a tonalist exploring interiors and urban scenes. Also presented is a unique scrapbook, held by the Metropolitan Museum of Art, that includes more than 50 drawings and sketches, mostly of sea scenes, and postcards and commercial photography of works of art, architecture, and tourist views. This scrapbook provides an intimate glimpse at the thoughts and experiences of the young artist on his first European voyage.

Start with a House, Finish with a Collection-Leslie Anne Miller 2014-05 This book is the story of how a couple's use of American art and antiques evolved from furnishing a house into a full-blown passion for collecting. Featuring exquisite examples of Hollingsworth and Morris family furniture, Weber boxes, Pennsylvania clocks and Kirk-Stieff silver, as well as American paintings by the Peale family, Edward Hicks, Edward Redfield and Horace Pippin, this museum-calibre collection reveals a pride in the early American sensibility. The combination of text and extraordinary photographs traces this remarkable journey and demonstrates that life can be more than comfortable living among these collections. The compendium catalogues the diversified and important collection, making this a valuable scholarly reference as well as a reading pleasure. 0.
