Raised in a family of blacksmiths, Sallows brings the kind of knowledge and respect for his trade that only decades of experience can imbue. Plain-spoken and no-nonsense, scarcely a sentence in this guidebook is wasted. The guide expertly shows how smiths work with and shape metal to the highest quality: attention to the temperature applied and the grade of steel used in the forging is shown to be of utmost importance. Unlike smiths of past eras, for whom weaponry and armor were important, Sallows was born at a time when demand for smithies was almost entirely for replaceable machine parts and industrial tools.
