The Jaguar XKs-John Nikas 2018-07-15 Highly illustrated throughout, here see the inside story of the development of the Jaguar XK120, XK140 and XK150.

Jaguar XK140/150 In Detail-Anders Ditlev Clausager 2008-11-15 Jaguar's series of XK sports cars used the remarkable twin overhead camshaft engine that was first exposed to the public in 1948 in the new XK120 two-seater, which took the motoring world by storm. For 1954 the XK120 was replaced by the mildly restyled XK140 model, with an increase in power, optional overdrive and a roomier cockpit. It was replaced in 1957 by the XK150. With disc brakes on all wheels, the option of engines up to 265bhp and a completely new body, the XK150 was an extremely competent performance car with more than a touch of glamour. This book opens with an exposition of the background to the introduction of the XK140, a key model because the XK120 was such a hard act to follow. Then comes a full technical analysis of the new car, covering all aspects of the chassis, running gear, engine and transmission. This sets the scene for the coverage of the XK150. Major production changes during the evolution of the two models are recorded, and production and sales worldwide are analyzed in depth. The author also provides information on prototypes and special-bodied cars.

Quitters Never Win-Michael Bisping 2019-07-25 SUNDAY TIMES BESTSELLER Some people are born to be a certain thing. And I was a born fighter. At the age of eight, Michael Bisping began his training in martial arts. By the time he was 15, he was fighting in his first no holds barred competition. When he turned professional and joined the UFC he was sure about one thing: only a world championship title would do. A British underdog in the greatest fighting championship on earth, he spent the next decade winning some of the championship's most sensational contests to achieve his dream, becoming the first ever British UFC world champion in 2016. From his boyhood years learning to fight in the gyms of Lancashire to his most shocking clashes in the cage, in Quitters Never Win Bisping tells the raw and unfiltered story behind his legendary career for the first time, including his greatest wins, his fiercest rivals and the harrowing injury that forced him into retirement. As audacious, entertaining and as candid as the man himself, it's a backstage pass to one of the world's most extreme sports and an unbridled account of what it really takes to become a champion, from sleeping in his own car to reaching the summit of the world's fastest growing sport.

Our Livable World-Marc Schaus 2020-10-13 A vital guide to the frontlines of our fight against climate change and the scientific and technological innovations that will revolutionize the world. The United States' accelerated plans to combat the existential threat of climate change finally give reason to hope. In Our Livable World, research specialist and author Marc Schaus explores the incredible new green innovations in science and engineering that can allow us to avoid the worst repercussions of global warming as we work to usher in a sustainable, livable world. To beat a challenge the size of climate change, our solutions will have to be ambitious: solar thermal cells capable of storing energy long after the sun goes down, "smart highways" designed to charge your vehicle as you drive, indoor vertical farms automated to maximize crop growth with no pesticides, bioluminescent vines ready to one day replace our streetlights, jet fuel created from landfill trash—and next-generation carbon capture techniques to remove the emissions we have already released over the past several decades. Far from the geoengineering schemes of cli-fi action thrillers, real solutions are being developed, right this moment. Our Livable World features interviews with the innovators, real talk on the revolutionary technology, and a clear picture of a cleaner planet in the future. "An important book that shows the dawn of a new kind of environmental movement—an age where we invest in deeply creative and fascinating technical solutions that work in harmony with the Earth. Marc Schaus lays out the exciting future of environmental innovation before us." —Katie Patrick, author of How to Save the World

Die Wirklichkeit der Medien-Klaus Merten 2013-07-01 "(...) Auf knapp 700 Seiten erwartet den Leser weit mehr, als der Haupttitel anspricht. Und davon profitiert nicht nur ein Student im Anfangssemester, sondern sicher jeder Leser, der sich die Mediengesellschaft zur Frage und zum Problem macht. (...) Weischenberg, Schmidt und Merten haben ein Lehr- und Orientierungsbuch vorgelegt, das fach- und sachspezifische Präzision mit interdisziplinärer Offenheit verbindet. (...) "Das Parlament 1-2/95"(...) Alles in allem liegt hier ein Werk vor, das künftig weder von Fachkennern noch von Studenten der Kommunikationswissenschaft und der Journalistik ignoriert werden kann."Rundfunk und Fernsehen 1/95

Porsche 911-Brian Long 2011-10-14 The second in a series of five books which chronicle in definitive depth the history of the evergreen 911, from earliest design studies to the water-cooled cars of today. The Man Without a Face-Masha Gessen 2013 Documents the Russian prime minister's rapid ascent from a low-level KGB operative to the presidency, describing his selection by an ailing Boris Yeltsin's oligarchy and the ways in which the author believes that his views and ambitions have renewed Russia's threatening position to its citizens and the world. By the author of Perfect Rigor. Reprint. 35,000 first printing.

The Caesars Palace Coup-Sujeet Indap 2021-03-16 It was the most brutal corporate restructuring in Wall Street history. The 2015 bankruptcy brawl for the storied casino giant, Caesars Entertainment, pitted brilliant and ruthless private equity legends against the world's most relentless hedge fund wizards. In the tradition of Barbarians at the Gate and The Big Short comes the riveting, multi-dimensional poker game between private equity firms and distressed debt hedge funds that played out from the Vegas Strip to Manhattan boardrooms to Chicago courthouses and even, for a moment, the halls of the United States Congress. On one side: Apollo Global Management and TPG Capital. On the other: the likes of Elliott Management, Oaktree Capital, and Appaloosa Management. The Caesars bankruptcy put a twist on the old-fashioned casino heist. Through a \$27 billion leveraged buyout and a dizzying string of financial engineering transactions, Apollo and TPG—in the midst of the post-Great Recession slump—had seemingly snatched every prime asset of the company from creditors, with the notable exception of Caesars Palace. But Caesars' hedge fund

lenders and bondholders had scooped up the company's paper for nickels and dimes. And with their own armies of lawyers and bankers, they were ready to do everything necessary to take back what they believed was theirs—if they could just stop their own infighting. These modern financiers now dominate the scene in Corporate America as their fight-to-the-death mentality continues to shock workers, politicians, and broader society—and even each other. In *The Caesars Palace Coup*, financial journalists Max Frumes and Sujeet Indap illuminate the brutal tactics of distressed debt mavens—vultures, as they are condemned—in the sale and purchase of even the biggest companies in the world with billions of dollars hanging in the balance.

Mille Miglia Story-Leonardo Acerbi 2012-05-15 24 editions from 1927 to 1957. 24 races featuring the greatest ever cars and drivers participated in the years either side of the Second World War. This in the briefest of terms is the Mille Miglia, the race par excellence; the marathon that for almost three decades traversed Italy, bringing to the nation's roads stars of the calibre of Varzi and Nuvolari, Biondetti and Fangio, Ascari, Moss and Taruffi driving for the likes of Alfa Romeo, Mercedes-Benz, Lancia and Ferrari. The book draws on a wealth of photographic documents, in particular for the post-war editions, from the Novafoto-Sorlini Archive, an important collection featuring the shots taken by the official race photographer, Alberto Sorlini, between 1947 and 1957. Thanks to this previously unpublished and spectacular material, the book evokes an era in which unforgettable chapters in motorsport history were written.

Embedded Security in Cars-Kerstin Lemke 2006-03-28 Most innovations in the car industry are based on software and electronics, and IT will soon constitute the major production cost factor. It seems almost certain that embedded IT security will be crucial for the next generation of applications. Yet whereas software safety has become a relatively well-established field, the protection of automotive IT systems against manipulation or intrusion has only recently started to emerge. Lemke, Paar, and Wolf collect in this volume a state-of-the-art overview on all aspects relevant for IT security in automotive applications. After an introductory chapter written by the editors themselves, the contributions from experienced experts of different disciplines are structured into three parts. "Security in the Automotive Domain" describes applications for which IT security is crucial, like immobilizers, tachographs, and software updates. "Embedded Security Technologies" details security technologies relevant for automotive applications, e.g., symmetric and asymmetric cryptography, and wireless security. "Business Aspects of IT Systems in Cars" shows the need for embedded security in novel applications like location-based navigation systems and personalization. The first book in this area of fast-growing economic and scientific importance, it is indispensable for both researchers in software or embedded security and professionals in the automotive industry.

Human Factors in Intelligent Transportation Systems-Woodrow Barfield 2014-01-14 The Intelligent Transportation System (ITS) Program is a cooperative effort by government, private industry, and academia to apply advanced technology to the task of resolving the problems of surface transportation. The objective is to improve travel efficiency and mobility, enhance safety, conserve energy, provide economic benefits, and protect the environment. The current demand for mobility has exceeded the available capacity of the roadway system. Because the highway system cannot be expanded, except in minor ways, the available capacity must be used more efficiently to handle the increased demand. ITS applies advanced information processing, communication, sensing, and computer control technologies to the problems of surface transportation. Considerable research and development efforts will be required to produce these new technologies and to convert technologies developed in the defense and space programs to solve surface transportation problems. ITS has been subdivided into six interlocking technology areas. This book addresses human factors concerns for four of these areas: * Advanced Traveler Information Systems are a variety of systems that provide real time, in-vehicle information to drivers regarding navigation and route guidance, motorist services, roadway signing, and hazard warnings. * Advanced Vehicle Control Systems refer to systems that aid drivers in controlling their vehicle particularly in emergency situations and ultimately taking over some or all of the driving tasks. * Commercial Vehicle Operations address the application of ITS technologies to the special needs of commercial roadway vehicles including automated vehicle identification, location, weigh-in-motion, clearance sensing, and record keeping. * Advanced Traffic Management Systems monitor, control and manage traffic on streets and highways to reduce congestion using vehicle route diversion, automated signal timing, changeable message signs, and priority control systems. Two technical areas are not specifically addressed in individual chapters, but many aspects of them are covered in associated chapters: * Advanced Rural Transportation Systems include systems that apply ITS technologies to the special needs of rural systems and include emergency notification and response, vehicle location, and traveler information. * Advanced Public Transportation Systems enhance the effectiveness, attractiveness and economics of public transportation and include fleet management, automated fare collection, and real-time information systems.

Dynamics of Globalization and Development-Satya Dev Gupta 2012-12-06 Dynamics of Globalization and Development debates the role of structural adjustment programs and policies, the implication of financial liberalization for growth and stability, the effects of foreign direct investment and the associated behavior of multinationals in terms of intellectual property rights, the diffusion of technology, growth and development. Many contributors offer innovative insights into the complexities of the process in terms of its micro foundations, and propose efficiency-based multinational policy frameworks. A general thrust of most of the studies in this volume is that the market-driven process of globalization alone will not lead to stable and equitable economic growth. Consequently, several contributors recommend a set of proactive policies to promote greater stability in the system and a more equitable distribution of the benefits of globalization. This anthology will provide valuable insights and important background analysis for scholars working in the field of globalization as well as senior undergraduate and graduate students in a variety of curricula, including economics, finance, development studies, and international studies.

Brakes, Brake Control and Driver Assistance Systems-Konrad Reif 2014-07-18 Braking systems have been continuously developed and improved throughout the last years. Major milestones were the introduction of antilock braking system (ABS) and electronic stability program. Lose Weight by Eating-Audrey Johns 2016-04-12 Popular blogger Audrey Johns lost 150 pounds in 11 months by eating all the foods she loved. Now she shares her secrets to help you lose weight, too! At 275 pounds, Audrey Johns was unhealthy and unhappy—until the day she vowed to give up the “fake food”—frozen “diet” meals, low-cal sodas, quick-to-make boxed foods—and taught herself to cook her favorites from scratch. In less than a year, Audrey mastered the kitchen and lost more than 150 pounds (more than half her body weight), going from a size 24 to a size 4—all while pinching pennies. Now Audrey shares her story, insights, and clean-eating recipes to help you slim down. *Lose Weight by Eating* includes more than 130 mouth-watering recipes for family favorites, including pasta, scones, nachos, meat loaf, and cookies—all bursting with flavor but with fewer than 500 calories per meal. Most recipes use simple and inexpensive Smart Swaps and are full of hidden

vegetables that keep you feeling fuller longer, and all are picky-kid-friendly and spouse-approved. Imagine losing 8 to 16 pounds the first week and 15 to 25 pounds a month eating skinny pizzas with only 125 calories per slice or 150-calorie cheesecake! Enjoy these delights and more: • “Jelly Doughnut” French Toast • California Club Pizza • Veggie-Packed Lasagna • Cheddar-Stuffed Turkey Burgers • Steak Fajitas • Skinny Watermelon Margaritas • Chocolate Peanut Butter Dip with Fruit • Skinny Cheesecake with Raspberry Drizzle Nutritious food doesn’t have to be boring, expensive, and difficult to make. Lose Weight by Eating is easy to follow because there are no rules, only goals you set for yourself. Complete with a handy six-week meal plan to keep you motivated, Lose Weight by Eating gives you the support and kitchen confidence you need to change your life, your body, and your health.
