**Our Livable World**-Marc Schaus 2020-10-13 A vital guide to the frontlines of our fight against climate change and the scientific and technological innovations that will revolutionize the world. The United States’ accelerated plans to combat the existential threat of climate change finally give reason to hope. In Our Livable World, research specialist and author Marc Schaus explores the incredible new green innovations in science and engineering that can allow us to avoid the worst repercussions of global warming as we work to usher in a sustainable, livable world. To beat a challenge the size of climate change, our solutions will have to be ambitious: solar thermal cells capable of storing energy long after the sun goes down, “smart highways” designed to charge your vehicle as you drive, indoor vertical farms automated to maximize crop growth with no pesticides, bioluminescent vines ready to one day replace our streetlights, jet fuel created from landfill trash—and next-generation carbon capture techniques to remove the emissions we have already released over the past several decades. Far from the geoengineering schemes of cli-fi action thrillers, real solutions are being developed, right this moment. Our Livable World features interviews with the innovators, real talk on the revolutionary technology, and a clear picture of a cleaner planet in the future. “An important book that shows the dawn of a new kind of environmental movement—an age where we invest in deeply creative and fascinating technical solutions that work in harmony with the Earth. Marc Schaus lays out the exciting future of environmental innovation before us.” —Katie Patrick, author of How to Save the World

**Shatterday**-Harlan Ellison 2014-04-01 “One of the great . . . American short-story writers” exposes the darkness of the human heart in these speculative tales of terror and tragedy (George R. R. Martin). A five-year-old boy never ages, living as an immortal in a past that no longer exists while the world encroaches upon his innocence, in the Hugo and Nebula Award-winning “Jeffy Is Five.” An alien attack leaves Earth on the brink of Armageddon, as humans find themselves unable to resist the sexual allure of their invaders in “How’s the Night Life on Cissalda?” In the Nebula Award-nominated “Shatterday” (subsequently adapted into the pilot episode of the second Twilight Zone series), a man fights for his life against a relentless enemy who knows his darkest secrets—his own doppelganger. In these and other thought-provoking stories, legendary author Harlan Ellison dissects the primal fears and inherent frailties common to all people and gives voice to the thoughts and feelings human beings bury deep within their souls. Unflinching and unapologetic, Ellison depicts men and women in all their ugliness and beauty, and humanity in all its fury and glory. Stories include “Introduction: Mortal Dreads,” “Jeffy Is Five,” “How’s the Night Life on Cissalda?,” “Flop Sweat,” “Would You Do it For a Penny?” (written in collaboration with Haskell Barkin), “The Man Who Was Heavily Into Revenge,” “Shoppe Keeper,” “All the Lies That Are My Life,” “Django,” “Count the Clock That Tells the Time,” “In the Fourth Year of the War,” “Alive and Well on a Friendless Voyage,” “All the Birds Come Home to Roost,” “Opium,” “The Other Eye of Polyphemus,” “The Executioner of the Malformed Children,” and “Shatterday.”
